

The Livery in Education

June 2019

**The Livery, developing support for education,
helping to prepare young people for the future.**

Livery Schools Link

Livery Schools Link was set up in 2003 to assist with support for school education by Livery Companies. In 2016 it became Livery Schools Link Ltd, a not for profit company limited by guarantee. In 2017 it became a charity, Reg. No 117234. It is run by a Board drawn from representatives of member Livery Companies who pay an annual subscription. We organise events for Livery Companies and schools, such as a careers showcase event for school-age students to learn about the skills, trades and professions of livery companies. We have a volunteer brokerage platform which matches requests from schools for help with activities, such as careers talks, with volunteers from Livery Companies. The annual Education Conference is another of our regular activities. For further information please contact us on: lis.goodwin@liveryschoolslink.org.uk. Our website is: www.liveryschoolslink.org.uk

**LSL is grateful to the Worshipful
Company of Goldsmiths for
sponsorship of this review.**

Chairman’s report

Welcome to the sixth edition of Livery in Education.

The text of the Annual Review continues to retain the emphasis of the individual Companies because each Livery Companies is an independent, sovereign and distinctive body. Their involvement in education is as diverse as the range of trades and professions that the Livery Companies represent. Further details of the Livery Companies and their activities can be found on their websites.

This Annual Review provides an insight to the work of Livery Companies and Guilds to support education and training. The amount of volunteer effort in education that is shown also demonstrates the high level of commitment by their members.

This year we are nearing the end of the pilot for The Volunteering Platform where over 200 Livery member volunteers and 108 schools signed up. Results are positive and, to demonstrate the exponential potential of The Digital Volunteering Platform, just 32 of the career talks delivered impacted 2,267 students with very positive feedback from teachers! We now planning to scale up for the next academic year, 2019/20.

Our themed career events have proved extremely popular with schools and the annual Livery Head Teachers’ Conference proved once again the value of the exchange of views between the Livery and schools on the ways they can work together to help young people. This year’s LSL- Careers Showcase is part of the City of London Careers Festival. Over 1300 secondary school pupils from 38 schools will be able to see and discuss career opportunities with the interactive and displays stand of the 40 Livery Companies who are taking part.

Once again we would like to thank all the contributors who provided information about the educational work undertaken by their Livery Companies and their members. We would like to thank the Worshipful Company of Goldsmiths in particular for their continued support in the preparation and production of this edition.

An electronic version of this booklet will be available on the Livery Schools Link website. Please email any comments and queries you have to me, Elisabeth Goodwin lis.goodwin@liveryschoolslink.org.uk

Dr Lis Goodwin
Chairman
Livery Schools Link Limited

Surprise for students at the 2018 Livery Schools Show case

THE RIGHT HONOURABLE THE LORD MAYOR

ALDERMAN PETER ESTLIN

THE MANSION HOUSE, LONDON EC4N 8BH
TELEPHONE 020-7626 2500

June 2019

For many years now, Livery Companies have played a key role in education. This has been done through the founding and funding of schools across the UK and through the backing of programmes and initiatives within schools, higher education, and professional trade bodies. The wealth of support provided by the Livery benefits students and staff in educational institutions across the country.

Following the Livery Education Conference back in March, this booklet - now in its 6th edition - provides an update and overview of the contribution and support given by the Livery in this sector.

The theme of this year’s conference was centred around preparing young people for tomorrow’s world of work. A key part of this focus being the promotion of digital skills for young people. As digital technology and innovation is set to be at the heart of future growth and competitiveness, I believe it is key that young people are taught the importance of digital skills. The Livery shares this aim and continues to develop its partnership with schools to understand how young people can be better prepared for the world of work.

I know that with the commitment of the Livery and increased collaboration with schools, new and effective initiatives will be developed to ensure that students across the country can meet their potential.

The Rt Hon The Lord Mayor
Alderman Peter Estlin

ACTUARIES

The Company of Actuaries undertakes a significant amount of charitable work. Much of its charitable giving goes into educational projects, with a heavy focus on mathematics. The Company provides bursaries at 12 universities for students studying for degrees or doing post degree courses in mathematics and actuarial science. We also provide prizes for excellence in mathematics at schools and universities and in the actuarial examinations of the Institute & Faculty of Actuaries. We are keen to support mathematics education and financial literacy in schools. We provide volunteers for the BEE (Business, Enterprise and Employability) programme in primary schools. In addition, a number of our liverymen are governors, provide careers training or deliver talks on mathematics and actuarial work in schools. We supported a 5 year research fellowship with the Royal Society to consider (a) to what extent studying advanced mathematics develops general thinking abilities and (b) how mathematics teaching and assessment can be structured to maximise the development of such thinking skills. The results of this research have proved to be quite significant and have enriched the current debate on the future policy and practice of mathematical education in the UK. We support the Royal Institution in their delivery of Mathematics Masterclasses, a network of hands-on and interactive extra-curricular sessions led by experts from academia and industry. Secondary school students attend a series of up to eight weekly sessions which go beyond the school curriculum and bring mathematics to life in surprising topics such as art and sculpture, computer science, design, medicine and cryptography. The programme aims to open the eyes of young people to the excitement, beauty and value of mathematics and to highlight the wide range of exciting careers that can lead from mathematics. We support two secondary schools in the South-East and one in the South-West in their community outreach programmes. All are outstanding in the level of mathematics enthusiasm and excellence that they engender within their schools. We are keen to ensure that such passion is passed on to the wider community, not just to those lucky enough to be in the schools' classrooms. In truth, these schools already set an excellent example in this regard; hopefully our involvement will ensure that this can continue and, indeed, expand despite funding pressures from the State. A recent venture has been to enter into a two year agreement with the Education Endowment Foundation to co-fund a mathematical reasoning programme to develop children's understanding of the logical principles underlying mathematics. The programme has involved 160 primary schools, with the results now being analysed to

test its suitability for wider consumption. In addition to the above, we support a number of other educational projects, including the annual Schools and Livery Companies' Education Conference often at Staple Inn the Actuaries' spiritual home, the Sheriffs' Debating Challenge and the Mansion House Scholarship Scheme.

AIR PILOTS

The Honourable Company of Air Pilots has been a member of Livery Schools Link for many years. The Air Pilots London Schools gliding scheme has been established for over 10 years. Schools are able to take groups of students on a day visit to a gliding school and experience a flight in a glider. In addition to learning about some aspects of aviation, students have an opportunity to see something outside their normal environment. It gives the students an opportunity to see experienced enthusiastic volunteers, their instructors, at work. This helps the further development of generic life skills including communication and team work. Around 200 students experience flight in a glider each year. We are delighted that several other livery companies have joined the scheme managed by the Air Pilots in support of their affiliated schools. For more information e-mail jptmoth@gmail.com As well as the school gliding days the Air Pilots offer scholarships for a week long gliding course and applications are open every year between January and the end of March. <https://www.airpilots.org/career-matters/scholarships/flying-scholarships-2019/> Information on 2018 Scholarship winners - <https://www.airpilots.org/career-matters/scholarships/flying-scholarship-winners-2018/>

Through the LSL, the Air Pilots host the Ray Jeffs Cup golf event every year. It is a very enjoyable and sociable competition for Livery Companies as well as a successful charity event. In its first 18 years over £61,000 has been raised from entry fees and donations from Livery Companies for Duke of Edinburgh's Award London, helping over 40 schools in the Greater London Area to set up or fund their schemes. The funds raised at the 2018 event meant that we were able to send a cheque to D of E London for £3,200 which will help schools start a D of E programme for their pupils this year. On award there is a presentation at every school jointly by LSL and D of E Award, London, who are very enthusiastic about our most successful association.

The Air Pilots also offer a wide range of scholarships each year. These include residential Gliding Scholarships and Private Pilot's Licence Scholarships. Flying Instructor Scholarships and renewals for Flying Instructors are offered as well as Career Development Bursaries towards ratings. Details of the awards can be found on the Air Pilots' website www.airpilots.org/career-matters/scholarships/ Application forms are available on the Air Pilots' website between January and March each year. Interviews where applicable are held in April or early May at the Company office in London. Find out more on twitter @AirPilotsCo Guidance is offered by the Air Pilots to those wishing to take up a career in aviation. A stand-alone website www.flying-start.org (produced by the Company) can be accessed directly or from the Company website and this provides useful information on flying as a career. This website is currently being updated with a new layout, navigation, and information. Talks on flying as a career can be offered to schools across the country; normally given by one of our volunteer members (who either is, or is accompanied by a current airline pilot). This briefing could be offered to careers staff subject to location and availability of our members. Contact these volunteers through the LSL website www.liveryschoolslink.org.uk

We take a stand at Flight Training events such as "Pilot Careers Live", (formerly 'Flyers Show'), offering guidance for students and parents considering investing in a professional flight training programme to help them ask appropriate questions of commercial training organisations. We also offer aptitude testing in conjunction with RAF Cranwell to help prospective students decide whether they have a reasonable chance of success before spending large sums of money to pay for a commercial pilots' licence.

In 2014 the Company developed, with the assistance of the Livery Companies Skills Council, a 1 year "pathfinder" Flight Instructor Higher Apprenticeship. Two apprentices were employed by a Flying School, provided with a substantial grant from the Skills Funding Agency, and were offered expert tuition by experienced instructors from within the Company. This year a further two apprenticeships have been offered. In addition, the Company, in conjunction with The Livery Companies Skills Council, has developed an Air Transport Pilot Higher Apprenticeship, which is eligible for student loans aimed at students wishing to become professional pilots. This scheme has strong interest from several airlines.

Along with many other livery companies the Air Pilots are stall holders at the now annual LSL Showcase Event for year 9 students. At this event we offer advice on careers in aviation and the chance to experience some pilot aptitude testing using computers with joystick control which is always very popular.

City University in London offers four aviation-related Master of Science (MSc) degrees - Air Transport Management, Air Safety Management, Aircraft Maintenance Management and Airport Management. These were set up some years ago in consultation with the Air Pilots who award bursaries annually to successful applicants studying for these degrees. All students enrolled on the courses are able to apply, whether pilots or not, and the awards are by competition. Initial selection is based on short written pieces and those short listed are interviewed by a panel of experienced Air Pilots. Three bursaries will be awarded in 2019.

The Air Pilots Trust (APT) and The Air Safety Trust (AST) also provide various educational grants and awards, in response to successful applications to the Trustees, and suitable applications are strongly encouraged. In previous years grants have been awarded to Cranfield University for aviation related post-graduate studies. In 2014, a new award, the Honourable Company of Air Pilots Saul Prize for Aviation Safety was inaugurated following the receipt of a legacy. It is now an annual award for a post-graduate student at Southampton University, working in the field of aviation safety.

APOTHECARIES

The society seeks to promote and encourage study and practice of the art and science of medicine, surgery and pharmacy, for public benefit and the advance of public education. Primary one bursary is given to every UK medical school and to schools of pharmacy to assist students who, in the final stages of their courses are experiencing financial difficulties. Support is also given to undergraduates on the Society's courses in the History of Medicine and in the Ethics and Philosophy of Healthcare. The society gives small prizes for academic achievements to one medical student from each of the London Medical Schools for excellence in the field of General Practice or Pharmaceutical Medicine, and to a student at Christ's Hospital School and at the City of London Academy. Support grants are offered to medical students taking their electives in countries with native rhinoceros populations. In addition to this the Society continues to exercise its original function of providing medical education by offering post-graduate diplomas in a variety of medical specialities.

ARBITRATORS

We provide the following through our Charitable Trust: grants to pupils at city-based schools; prizes to students at King's College London, the City Law School and the City of London's School for Girls; loans and grants to those wishing to complete tertiary education in private dispute resolution. The Trust supports various events run by the Company's Education and Pupillage Committee.

Each year, we organise a competition for universities, law schools and trainee lawyers. This alternates as a UK mediation skills competition and an international arbitration weekend. We also have a pupillage scheme, which aims to provide practical experience to those seeking to pursue careers as arbitrators, mediators and adjudicators. We fund travelling scholarships, enabling recipients to travel overseas to experience private dispute resolution processes in other parts of the world. In association with Keating Chambers, we run an annual seminar on developing a practice in dispute resolution.

We are keen to promote social mobility through education. To this end, we have been collaborating with a London-based charity, Team Up. We have made grants to them and recently participated in our first enrichment day on careers in law and dispute resolution. We are also forging a close association with the Saracens Multi-Academy Trust. We count among our liverymen school governors and mentors.

ARMOURERS & BRASIERERS

The Armourers & Brasiers' Company allocates two thirds of its charitable giving to support for Materials Science education and research. It provides targeted support, throughout the UK to each tier of science education from primary school to post-doctoral level, with an increasing focus on Materials Science at the higher levels of education. It works in partnership with leading companies on agreed schemes of charitable giving in support of science education and research. At school level the Company provides equipment grants for primary and secondary schools and organises a Materials Science Prize scheme for sixth form students. It also gives grants to museums in support of their science education work and to organisations and institutions working to recruit school students into scientific careers. Through its partner companies it supports schools outreach projects and gives prizes and awards to outstanding apprentices. The Company awards prizes to top students in leading Materials Science departments at UK universities and gives travel grants for attendance at academic conferences to PhD students in Materials Science. More information about how the Company supports science education and research is available at www.armourershall.co.uk

ARTS SCHOLARS

The Company's educational activities centre on support for education and potential careers relating to the historic and decorative arts, including their history, curation, preservation, collection and trade.

The Company is a key supporter of the Lord Mayor's Cultural Scholarship Scheme, now renamed the Arts Scholars' Cultural Scholarship Scheme, designed to encourage 6th form internships with cultural institutions around the City. The Company awards bursaries to MA students studying Arts History at Sussex and York Universities. Annual awards are given to two West Dean College students for preservation of our Heritage. Each year the Arts Scholars' Charitable Trust sponsors the Geoff Egan Internship for the Portable Antiquities Scheme and supports a four-year funding programme for a decorative

art conservation intern at the Royal Collection Trust.

An annual grant is made to the Association for Art History for its "Ways of Seeing" Conference, aimed at promoting history of art education at state secondary schools. In 2017 and 2018 the Company was a donor for the ARTiculation regional heat, held at the Courtauld, of an annual public speaking competition for students aged 16-19 from selected London state maintained secondary schools.

The Trust supports an after-school educational initiative organised by Charterhouse for local primary schools. Financial support has been given to the Richard Cloudsley School in Islington.

The Company makes an annual "Geoffrey Bond Travel Award" to assist travel by students in support of arts - related educational study and research and an annual "Arts Scholars' Research Award" for graduate research in the decorative and historic arts.

The Company has an affiliation with the University of London Officer Training Corps and recently started a new affiliation with the Thames Valley Wing Air Cadets.

The Company recently attended an event at the Tate to give guidance to students about the broad range of potential careers relating to the arts world.

The Company recently attended an event at the Tate to give guidance to students about the broad range of potential careers relating to the arts world.

BAKERS

The Bakers' Company is one of the most active Livery Companies in engaging with its traditional trade. The continuing success of the baking industry depends on the quality of its workforce, relying on young people choosing baking as a rewarding career. The baking industry provides considerable development opportunities for young people, through further education at bakery schools around the country, or through a recognised apprenticeship scheme. The Bakers Company has a long history of supporting and encouraging the education and training of young bakers.

For over 100 years, the Company has had a continuous relationship with the National Bakery School at London Southbank University. For many years, Liverymen have provided skills training to students there on a regular basis, and this service has been extended to bakery schools elsewhere, including Leeds, Birmingham, Manchester and Blackpool.

Every year the top student at the National Bakery School in London is awarded the Freedom of the Worshipful Company of Bakers, an incentive to hard work which is highly prized. Over the last 50 years, several of the Company's Masters have been former top students of the School, and are now well-respected figures in the baking and food industries. In addition, the Company awards prizes at the conference of the Alliance for Bakery Students and Trainees – an annual gathering of students from bakery schools and colleges throughout the UK and Ireland. Over two thousand competition entries are received and judged during the course of the conference by leading experts in the baking industry, including several Liverymen of the Bakers Company.

The Company's most prestigious training is the annual short course run at one of Europe's top baking and confectionery schools. Applications for this are received from bakery students in the UK and Ireland who may be currently attending a bakery course, or training in industry. The successful applicants receive training from some of the world's finest craftsmen, and take their new skills back to use or to train colleagues. For over twenty years the Bakers Company has also sponsored both the London University Officer Training Corps and the London University Royal Naval Unit, with the dual aim of helping students to develop as individuals and supporting the Military in their recruitment programmes for the Armed Forces. The Company meets annually with the students and permanent officers of each unit; and there are reciprocal visits by students and Liverymen to Bakers Hall events and military exercises in the field. Elsewhere, the Company has always had a close relationship with the City University and funds one of the University's prizes.

One of the most recent initiatives proudly supported by the Company has been the 'Lessons in Loaf' project in primary schools in the East End of London. Under the scheme, pupils make bread from flour they have milled from wheat that they have grown in their own playground.

BARBERS

The Company supports education (particularly in the field of medicine), the relief of suffering and the support of causes connected with London, particularly The City. Education is supported in a variety of ways. The Barbers' Company works closely with the Royal College of Surgeons of England, in recognition of the Company's important contribution to the development and education of surgeons in England. The McNee Awards are made to mature medical students who already have a non-medical degree and therefore do not qualify for loans from the Student Loans Company.

Awards are also made to surgeons, usually specialist registrars, who are travelling to an overseas centre of excellence where a new or highly specialised technique or procedure can be observed and mastered before the recipient returns to practise or teach the technique in this country. There are also awards for educational projects undertaken by members of the Medical Artists' Association. The nursing profession is supported by the award of scholarships to nurses who are undertaking projects to extend their clinical skills.

The Barbers' Charities have, since 2009, been helping to fund an Outreach Worker based at King's College London, who visits maintained sector secondary schools in Inner London boroughs to encourage and advise pupils considering a medical career. The Company also funds Medicine in Action lectures, and Medical Activity days for young people. Many of those attending these events are accepted onto the "Extended Medical Degree Programme" run by King's College's Widening Participation programme, and the Barbers award prizes to students on this course. The success of this Outreach scheme since 2009 has now led to the creation of an 'Outreach 2020' Appeal, which has raised nearly £200,000 from sources beyond the Company to match its own equal commitment. The object is to double the proven

Picking up the 2018 LSL Showcase challenge

effectiveness of the Outreach scheme by funding a second Outreach worker who can visit more schools and encourage more young people to believe that they too can train as doctors and so help them to realise that ambition.

Education of a more general kind is supported by giving prizes to pupils at several schools and by supporting the scholarships fund at the Guildhall School of Music & Drama. There is active involvement with Livery Schools Link, and members are encouraged to participate in activities organised by LSL such as the annual Livery Careers Showcase at Guildhall, and medical careers events held in Barber-Surgeons' Hall.

BASKETMAKERS

The Company has had a link with Notre Dame School in Southwark since the Livery 'Adoption of Schools Scheme' initially running courses in basketry under the Duke of Edinburgh's Award scheme and providing funding and now teaching basketry in some special classes. The Basketmakers' Charitable Trust also fund Tower Hamlets Parents Centre, Hackney Quest (providing help with after school activities, family support and volunteering), St Mary Le Bow young homeless project and the Theatre Royal Stratford East, who do a lot of work with young people. Other support to schools is offered through school governorships, careers advice, work placements, tuition in basketry and help on initiatives such as 'Presenting yourself'. Members of the Company are also involved in the field of education ranging from Chair of a schools' forum to trustee of National Crimebeat. Ideas for future initiatives are always being discussed.

BLACKSMITHS

Our main contribution to education is the provision of bursaries to assist aspiring young blacksmiths at colleges of further education. In particular, we sponsor students at the National School of Blacksmithing in Hereford and the Plumpton College in Sussex. There is keen competition for bursaries and we judge students' applications on a broad range of criteria before committing funds.

In addition, the Company runs an Award scheme ranging from a

Certificate of Competence to Gold medal. In this way, professional development throughout a blacksmith's career is assessed by their peers and recognised annually at a Company Luncheon in the City.

BOWYERS

An MA Scholarship is funded in the History Department of King's College London and from 2018 a further MA scholarship is funded in the History of Warfare. Funding support is contributed to KCL's 'Widening Participation' programme of outreach to schools which helps greater numbers of deserving low-income students to apply for university places. The Company also supports the Treloar's Trust and the Wide Horizons outdoor activity centre which provides extra-curricular activities for South East London schoolchildren. The Company funded an archery range and provides replacement archery equipment. Prizes are funded, and a hardship fund supported, at the Central Foundation Girls' School in the East End of London; two governors of the school also come from the Company, one of whom is Vice Chair.

BREWERS

The Worshipful Company of Brewers is the trustee of two major foundations and a number of smaller charities that support Aldenham School in Elstree, Hertfordshire and Dame Alice Owen's School in Potters Bar, Hertfordshire, as well as educational projects in Islington. The grants from the foundations support both capital and revenue projects. There are also grants available for students at the school, alumni and staff. The Brewers' Company, who provide governors to the two schools, also present prizes, award beer money and deliver lectures on brewing and routes into the brewing industry to both of their schools. In Islington, the Brewers' Company supports a range of programmes which promote aspiration and educational achievement in primary and secondary school students including Upward Bound, the Music in Secondary Schools Trust, Company Three, Philosophy for Children and STEAM Hubs.

The Brewers' Company also awards an annual scholarship for a brewing related project to a student on the MSc course in Brewing and Distilling at Heriot Watt University, as well as prizes to students on the Institute of Brewing and Distilling's General Certificate in Brewing and General Certificate in Packaging courses.

BRODERERS

Through the Broderers' Charity Trust, the Company supports a range of academic and educational enterprises involving the study and application of embroidery. Specifically, it leads a 5-year sponsorship of the Royal College of Art in the innovative use of textiles; sponsors Future Tutors and students at the Royal College of needlework and provides an annual scholarship through the Queen Elizabeth Scholarship Trust.

BUILDERS' MERCHANTS

Training and education are key objectives of the Worshipful Company of Builders' Merchants, which is taking a lead in developing awareness

of the varied and exciting job opportunities in our industry, in particular through our recently launched #BuildACareerWithoutLimits campaign. We work closely with the Builders Merchants Federation (BMF), the Rainy Day Trust and other recognised industry bodies to help spread the word, and to provide support with bursaries for individuals looking to further their qualifications and careers in builders' merchanting. We are looking at developing grants and other similar initiatives to help individuals take advantage of apprenticeship programmes and training courses. A number of our Liverymen also provide careers training or deliver talks in schools. We are regular stall holders at the annual Livery Schools Link Showcase event for school students, where we introduce students to the opportunities to 'build a career without limits' in one of the many facets of our industry.

For the last eight years, the Company has awarded prizes at its City and Awards Luncheon to individuals who have done exceptionally well in their examinations relating to our industry. This year we awarded prizes to three BMF students for their achievements in their studies: the awards were for 'Best Student' on the BMF Diploma in Marketing; 'Trade Supplier Apprentice of the Year', and 'Best Online Student'.

Through our Charitable Fund we make annual donations to the City and Guilds of London Institute, the City and Guilds of London Art School, the Guildhall School of Music and Drama and the Mansion House Scholarship Scheme. We have also agreed three-year grants for the Building Heroes Education Foundation (which provides skills training to military veterans and support into employment in the building trades), for the Prince's Foundation (to support its Building Craft Programme in Heritage Skills) and for Chickenshed Theatre (a charity which brings together young people from all social and economic backgrounds, cultures and abilities, many of whom have been marginalised by society and excluded from mainstream educational settings, to study creatively alongside one another).

In addition, awards have been made to individual musicians studying at the Guildhall School of Music and Drama, and to students of historic carving at the City and Guilds of London Art School.

BUTCHERS

The Worshipful Company of Butchers Education Charity has supported scholarships and project at Harper Adams University, the UK's highest supplier of graduates to the meat and livestock industries. Harper has teaching staff with specialised meat knowledge and funds made available by the WCB were used to develop the unique MSc Course in Meat Business Management. To date over 60 people have completed the Postgraduate Certificate stage of this course – mostly on a part-time basis. The company has also funded students from SME meat companies to complete the Diploma and final MSc stage of the course. The Company has provided funding for the production of butchery videos to enhance the value of Harper's meat courses at undergraduate and postgraduate level. Videos for beef, lamb, pork and poultry help develop a practical understanding of butchery skills, as well as improving experience and expertise on the value and use of different

cuts. It has also funded equipment for Harper's Food Creativity and Innovation Laboratory, which enables students to undertake food photography, packaging design and product development. As one of the sponsors of The Harper Adams Food Science Summer School for year 12 school students, the Company aims to give students insight into the topic of food science and technology and provides encouragement about careers in the food industry with meat featuring strongly in some of the practical sessions. In 2018, 30 students enrolled for the school and it is planned that between 40 and 60 will attend in July 2019.

The Company also sponsors Nuffield Farming Scholars – a scheme which has an excellent record of developing young people for leadership and greater responsibility in their respective companies / organisations or farming situations. Suitable applicants from the meat and livestock industry of between 25 and 45 years of age are invited to explore a project of their choice through study and travel. The project must be completed within 18 months of the award, with the scholar expected to travel for at least eight weeks in total. Reasonable travel and subsistence costs are provided to fund the study as well as practical assistance with study and travel plans. On completion of their travels, scholars are expected to compile a report for submission to the Nuffield Trust.

The Company have been supportive of the revised trailblazer apprentice standards for level 2 Butcher, level 3 Advanced Butcher and level 2 Abattoir worker and have provided funding to assist in the development of these standards. WCB has also been appointed as the External Quality Assurance Organisation for these apprentice end point assessments.

The Charity and Education Committee works closely with The Institute of Meat and co- host the annual prizegiving. WCB also work closely with The Food and Drink Training and Education Council where there are common objectives, as it does with the Livery Companies Skills Council.

WCB supports a variety of butchery competitions that enable competitors to demonstrate that craft skills are still a very important part of today's meat industry. Not only are butchers required with first-class knife skills to drive the industry forward – they also need to be creative butchers too. In butchery there's no shortage of opportunities for keen young butchers to showcase their ideas and skills. Competing in butchery competitions is a sure-fire way of progressing to the very top of their profession. The Premier Young Butcher Competition (PYB) is aimed at butchers under the age of 23 at the time of the competition. The competition usually takes place at a trade exhibition and so attracts significant attention. Young butchers have an entire day to flex their creative muscles in many categories. The International Young Butchers Competition (IYBC) is an annual European competition run by the International Butchers' Confederation, based in Brussels. The competition spans two days at the host country, which varies year to year. The disciplines are very similar to those of the PYB; which in many ways is used to nurture competitors for the IYBC. Several teams, consisting of two craft butchers aged up to 25 years old compete for the team prize and the 'International Young Butcher' title.

During the last five years WCB has worked closely with Teach First. The

work it has done together includes Liverymen welcoming students from local schools into their businesses to provide young men and women with the experience of a workplace. In addition, members of the Livery have acted as coaches to teachers, mentors to students and arranged for individuals who have experience of apprenticeships to talk about this form of training to classes of students. WCB has introduced Teach First to Harper Adams resulting in students from schools supported by Teach First attending Harper Adams's Food Science Summer School.

CARMEN

The Company supports five schools through its Benevolent Trust: Christ's Hospital where 2 students are financed throughout their time at the school; King Edward's School Witley where 3 students are financed in the sixth form; City of London Freeman's School where three students are awarded a partial bursary; Treloar's School supported by an annual donation and special donations e.g. to the Department of Speech and Language; St Paul's Cathedral School where a chorister is partly funded. The trust has also raised money for mini-buses for disadvantaged children and currently is supporting a university student. Medical research has also been funded. A trustee is a governor at Christ's Hospital and another at Treloar's.

CARPENTERS

The Carpenters' Company's main focus for education is the Building Crafts College in Stratford, East London, which it founded over 100 years ago and which it still governs. The College has expanded tenfold in the last decade and now teaches vocational and craft skills to more than 500 students each year. The Company also supports individual students at leading universities such as Oxford, Cambridge and City University and the Royal College of Art, the City & Guilds London Art School and Guildhall School of Music. The Company also gives grants to schoolchildren at all five City of London Schools including Christ's Hospital, City of London Freeman's School and King Edward's, Witley. The Company supports other charities involving young people such as London Youth Rowing, the William Morris Craft Fellowship and The Creative Dimension.

CHARTERED ACCOUNTANTS

The primary educational objective of the Company's charity is to promote numeracy and literacy. It is in the second year of supporting the charity "MyBnk" to provide direct teaching of financial literacy and an understanding of savings and investment in line with the National Curriculum. Members are encouraged to offer mentoring support to students at the schools supported by MyBnk.

An award is given annually to a student at the City of London Academy who is studying mathematics or business studies at Alevel. In addition, bursaries are awarded to music therapy students studying at the Guildhall School of Music and Drama.

CHARTERED ARCHITECTS

The Worshipful Company of Chartered Architects is a modern Livery Company. The Company promotes quality architecture in the City of London and the architectural profession globally, it supports education through awards and prizes as well as a range of charities related to the City.

In education, there are book token prizes to the City of London (Boys) School, the City of London Girls School, the City of London Freemen's School and the City of London Academy Southwark. The first two are presented at ceremonies in Guildhall by the Lord Mayor and Lady Mayoress. The Company also supports the Royal Academy attRAct initiative. This programme offers London-based A-level art students the chance to engage with art and architecture through a specially designed programme of workshops, exhibition tours, studio visits, mentoring sessions in the RA schools, gallery visits and careers and portfolio advice.

In the wider world, the Company partners five other building industry and educational professional bodies sponsoring the annual Teambuild. This is a weekend residential event for young professionals from all disciplines of the building industry and is aimed at developing skills in leadership and co-ordination in the industry. Individuals are grouped into multi-discipline teams and are set a series of tasks to solve, related to a realistic building scenario. This is a competitive event and awards are given for overall teamwork, individual leadership, the team that learned the most over the course and the best procurement, contract and risk assessment presentation.

The Company also welcomes student members. In the tradition of the Livery, students are 'bound' to senior members of the Company who provide regular mentoring and advice. This mentoring is intended to give students an insight into practice and to enhance their learning experience, providing support on professionally-related matters. Alongside this an annual drawing prize and a travel scholarship are awarded to students studying at one of the London schools of architecture.

The travel award provides an international travel grant to a student or group of students enrolled in a RIBA-validated Part 2 course in a school of architecture in the Greater London Area. The drawing prize aims to encourage excellence in traditional drawing and computer-generated images. Entries are exhibited at the annual election court dinner and previous winning drawings can be seen on the Company website - www.architectscompany.org

CHARTERED SECRETARIES AND ADMINISTRATORS

As a profession which has responsibility for standards in Corporate Governance and Administration, the Company of Chartered Secretaries and Administrators (WCCSA) is acutely aware of the importance of education to the success of any organisation. To this end, WCCSA supports the education of children and young adults in preparation for their chosen trade or profession – whatever that turns out to be.

The Company has for a long time supported the education of children

in deprived areas of London, specifically, Rokeby School in Newham; where the provision of Governors, as well as encouragement to the pupils and staff, has contributed to a remarkable turnaround of this once failing school to one that is now well respected for academic and sporting achievement: and Mulberry Academy Shoreditch; where the provision of Governors, as well as encouragement and mentoring of pupils and staff, has been acknowledged as a great support to the newly appointed head teacher.

Beyond secondary school the Company supports the educational initiative in the Company's own professional institute by offering an apprenticeship scheme for the support of students studying for the professional qualification. The Company has also sponsored prizes recognising achievement in the Armed Forces and has had a long association with the West Ham Sea Cadets.

The Company continues to seek further opportunities to support education at every level, for the benefit of children and young adults, from all walks of life.

CHARTERED SURVEYORS

The Company has close links with four London state secondary schools (Robert Clack School of Science in Dagenham, St Saviour's & St Olave's School in Southwark, Archbishop Tenison's School in Lambeth and Central Foundation Girls' School in Bow) to which limited financial support is offered coupled with hands on assistance with careers talks and visits to and talks at City landmarks. In addition, the Company facilitates professional mentoring through IntoUniversity at two of the schools and provides a significant sum per annum to Archbishop Tenison's School to enable the school to grow its music department. Each school is offered one bursary per annum for a student who will study the property profession in its widest sense at university.

The Company makes a major grant annually to the Guildhall School Trust and sponsors a music competition at the Guildhall School of Music & Drama annually which ranges from strings to voice (a different category is usually selected each year).

The Company is a significant benefactor of the Chartered Surveyors' Training Trust which was set up in 1984 to offer college places coupled with work experience to young people who wished to enter the property profession but who could not do so by the traditional route of Higher Education. The CSTT now offers apprenticeships to young people wishing to enter the property profession.

CLOCKMAKERS

The Clockmakers' Charity (registered number 275380) awards annual prizes to horological students at West Dean College, the British Horological Institute, Birmingham City University, British School of Watchmaking and University College London Observatory. There is also a Research and Personal Development Award available to post-graduate students. The Company's Clock Collection, one of the finest on public display in the world and managed by the Clockmakers' Charity, is located in the Clockmakers' Museum that is on the 2nd Floor of the Science Museum in South Kensington. In addition to offering public access to the collection of clocks, watches and other horological items, tours are organised and student work is displayed. A programme of digitization of the Company's Archives is underway, to facilitate student education and research.

The Company is represented on the George Daniels' Educational Trust Advisory Committee, the body that advises the George Daniels' Educational Trust (GDET) on all horological training matters. GDET is an Isle of Man based charity (registered number 1096) that provides support to, amongst other disciplines, clock and watchmaking through student awards, an apprentice programme and training establishment equipment funding. Further details can be found at www.gdetac.org.

CLOTHWORKERS

A central facet of the Clothworkers' educational focus, either through the Company or its sister Foundation, is its very longstanding partnership with the University of Leeds, the successor to Yorkshire College of Science, founded, with the Company's support, in 1874. This now takes the form of bursaries for MSc and PhD, as well as summer placements. In 1878, the Clothworkers' joined forces with 15 other Livery Companies and the City of London to establish City and Guilds. The Clothworkers' has supported the Royal Institution over many years (including extensive mathematics programmes); various funding requirements at Cambridge University (notably scholarships at Fitzwilliam College); and numerous textile-related scholarships at tertiary level.

The Clothworkers' Foundation, 42 years old in 2019, makes primarily capital grants across a number of programme areas. Projects relating to special schools, for example, for the physically disabled and for young people on the autism spectrum, have been supported. The Clothworkers' also assisted with the establishment of a Centre for Research in Autism and Education, within the Institute of Education at London University. Also of ongoing interest is education and training for prisoners and ex-offenders.

Encouragement is given to young people to enter the UK textile industry through subsidised work placements; organising an annual conference on opportunities in the sector (Making It in Textiles); and fostering apprenticeships in Yorkshire.

Support of £90,000 over three years is in place with the Crafts Council, towards its flagship education programme Make Your Future. This hands-on programme brings together traditional textile-making with digital technologies to stimulate the creativity of young people and inspire future careers in textiles.

For a number of years, funding has been deployed for student bursaries through the Royal College of Art, Central St Martins and the University of Huddersfield, as well as making capital grants for the purchase of equipment.

On a separate front, the Company co-funds a Trustee Leadership Programme, to provide practical grounding for would-be trustees to support best practice in the Third Sector.

COACHMAKERS

The Coachmakers' Company is: 'An active livery investing in young people.'

The Company has a long-established relationship with City University, Kingston University, Cranfield University, Imperial College, The Royal College of Art, Capel Manor College, The Air League and The Cambridge Flying Group. We support schools through Livery Schools Link. We have helped to fund the Imperial College Outreach programme, specifically providing support for the Makerspace initiative in White City and we work with the Saturday Engineering Club for secondary school students at Kingston University.

The Coachmakers Company provides various bursaries as follows: for students reading aerospace subjects at Kingston, City and Cranfield Universities; for aspiring pilots; for aircraft technicians or mechanics; for students at the Royal College of Art studying car design; for young female engineers which is provided in conjunction with partners in industry; for the Young Craftsman of the Year among motor apprentices working in the specialised field of classic car maintenance and restoration.

The underlying theme for Company support is to young people working in or preparing to work in the core industries supported, namely automotive, aerospace and coach making / driving. The Company has established apprenticeships in the automotive, aerospace and coachmaking sectors and has launched a joint apprenticeship with the Wheelwrights.

The Company has supported a Coach Restoration Apprenticeship, in association with the Livery Companies Apprenticeship Scheme, and the first apprentice on this scheme qualified from the Royal Mews in July 2017.

Individual Coachmakers are encouraged to give their time to help mentor schools through The Livery Schools Link. The Company is an active and proud supporter of the Livery Schools Link Careers Showcase.

Looking up and learning the work of Joiners and Cellers

CONSTRUCTORS

The Company has an ongoing support to scholarships and awards primarily focused in the construction industry with particular reference to mentoring the applicants and supporting them with their publication's and presentation. The Company makes annual awards to selected degree students at The London South Bank University and The University of Westminster.

The Company is a supporter of the Master Certificate Scheme which is run in partnership with the City and Guilds and participating Livery Companies. This year Max Alexander Cotterill, a stonemason at Hereford Cathedral, was awarded the Apprentice Stonemason Certificate, and Alec Curtis was awarded the Journeyman Stonemason Certificate.

The Company with over 300 members in every discipline within the Construction Industry continues with the financial support of Livery Schools Link and the ongoing enrolment of Liverymen and Freemen to join the LSL Volunteering Programme where schools and colleges can resource speakers on a wide range of construction careers and topics providing motivational career talks and supporting employability days. This new web based service also addresses the need to inform the world of the purpose and history of Livery Companies and their function within the City and industry.

The Company have for many years supported the national Teambuild UK Competition (teambuilduk.com) which was created by Past Master Constructor Richard Rooley in 1990 with the Teambuild Association becoming a Registered Charity in 2011 with the aims of "the advancement of education within the Construction Industry". Teambuild is a multidisciplinary construction industry competition which gives you the experience of a real site scenario from design and development right through to construction. The Constructors and Architects Companies both provide financial support by way of team prizes and competition judges.

Finally, the Company continues supporting Mill Chase Academy School in Hampshire and have recently received the following support letter from the Head of Construction and Design, Noel Thompson.

"Following the Worshipful Company's original kind renovation of our old workshop - at that time it was being used as a storage room! to a fully operational Carpentry workshop, the most recent addition is a pillar drill and belt sander. The purchase of these two machines has not only allowed for greater quality of carpentry projects, but has also increased productivity and engagement with the greater breadth of project they have made possible.

In addition to the great help the Company has rendered to the Construction and Design Department's practical resources (and therefore delivery and attainment), the addition of architectural drawing boards and other class resources, has undoubtedly been a factor in the following. Since the Company's support of the department started here at Mill Chase, the amount of students choosing Construction and Design as a GCSE option has more than doubled; the class of 2015-16 contained only 8 pupils, the present Yr10 class at Mill Chase is 18 strong (the Mill Chase average for GCSE options classes is 15)

Additionally, last year's cohort had the second-best results for progress in the school, all C&D students gained their first choice college place and just under 80% went on to a Construction related course at college; including one student being head hunted by Barratts and Taylor Wimpey, following a Mill Chase C&D field trip, for Site Manager's apprenticeship.

The support of Honorary Court Assistant and Chair of the Company's Charitable Trust Ken Kent has been invaluable and we at Mill Chase, as we look to move into a £36million pound new school site, with potentially ex-students working on its construction, cannot wait to take future cohorts forward with their continued support, for the further benefit of our students."

COOKS

The Worshipful Company of Cooks continues to support the team of dieticians at Treloar's College. The Company's Apprentice Scheme (in conjunction with Westminster Kingsway College) is now into its fifth year and five of the first graduates are currently apprenticed to Masters within the Company (the first since Victorian times). There are

Cooking and Food as a career choice with the Cooks

two presentees at Christ's Hospital School and, each year, a donation is made to the school for on-going projects. Support continues to be given to the Royal Academy of Culinary Arts' 'Chefs adopt a School' Programme and to catering students at New City College. (Hackney)

The Company's major event to recognise success in catering is the annual Prize Winners' Lunch at which two City and Guilds Prizes (for catering students nationally) and one prize for the best MSc dissertation on the Food Policy Course at City University are awarded.

In conjunction with the WCO Innholders and the Springboard Charity a Schools' activity day was organised in January 2019 at The Shard. 64 local schoolchildren took part in six different activities throughout the day, ranging from cooking to bedmaking, illustrating the breadth of opportunities within the hospitality industry. It is intended that the format will be rolled out to other locations in the near future.

The Company provides governors for New City College and Christ's Hospital School.

COOPERS

The Company supports two educational establishments: The Coopers' Company & Coborn School in Upminster, Essex with governors and foundation governors along with financial support; and the Strode's Campus in Egham, Surrey (formerly Strode's 6th Form College) of Windsor Forest Colleges Group with foundation trustees and financial support. The Company is historically linked to both seats of learning and there is a wide range of involvement with both, providing prizes, bursaries etc. on an annual basis.

Furthermore, the foundation owns the land and buildings at the School and students happily wear the Company's coat of arms on their uniforms. With the Campus, the foundation owns the land and buildings and there is a long-standing relationship, with the Company playing a supporting role.

The School foundation assists in the selection and financial support to teachers as and when required.

The Company concentrates its efforts in supporting the School and Campus in any way it can. In the case of the Campus, this results in particular from the rise of school 6th forms thereby creating new competition for pupils, reduced Government funding and temporarily declining demographics generally.

In providing support to the Board of Governors and Foundation of the School, the Company is aware of the difficulties that lie ahead and ensure that it uses its wider contacts to best assist them in achieving their strategic goals.

Both the School and Campus produce apprentices each year, many of whom return as liverymen to play a part in both the Company and the continued links to both establishments

CORDWAINERS

The Cordwainers Company provides bursaries and scholarships for students of footwear and leather accessories studying in the UK. These are given to students at De Montfort University, the University of

Northampton, London College of Fashion and Capel Manor College. Launched in 2014, the annual Cordwainers National Footwear Student of the Year Awards celebrates the best in student footwear design and forges links between footwear education and the footwear industry.

The Cordwainers also provide grants to nurses and medical students at the Royal Free Hospital and University College London, music scholarships to students at City University and the Guildhall School of Music and Drama, a cordwainer scholarship at the Queen Elizabeth Scholarship Trust, and supports the development of shoe making apprenticeships by the British Footwear Association.

The Company supports The Urswick School in Hackney with both grants and other non-financial benefits. An imaginative outreach project with The Urswick School involves the Guildhall School of Music and Drama working with students to produce an original performance piece for the school's annual prize-giving service.

The Company focuses plans to the specific beneficiary rather than having an overall theme for giving.

CURRIERS

The Curriers' Company offers financial support to Aerodrome Primary School, Croydon paying for the transport for the school choir and a familiarisation visit to Cambridge University. The Company donates to Tower Hamlets Youth Sports Foundation which aims to develop young people in the London Borough of Tower Hamlets through and in sport, funding Coach of the Year Award and Most Improved Sportsman. Its key objective is to use involvement in and access to sport in this, the most socially deprived borough in London, to impact on; educational achievement, social cohesion, health, crime and anti-social behaviour reduction, youth employment though greater employability of young people up to the age of 19.

The Company supports Capel Manor College for awards in leatherwork. The Company offers the following prizes: Curriers' Company Historical Essay Prize on the history of London; eight school History Prizes to the Oasis Academies of Coulsdon, Enfield, Hadley and Shirley Park; Capel Manor Bursary; University of Northampton two bursaries to support Final Year students; two awards at the London College of Fashion, one for excellence in leather and one for outstanding students to help finance their placement year. The Company also donates two bursaries to the City of London Academy Southwark; two bursaries to the Compass School Southwark and one bursary to the London Youth Choir. The Company has also made donations to the Compass School towards their workshop to buy tools for the "Leatherwork Enrichment" project.

The Company's charitable general guidelines limits its' giving to smaller, inner-London-focused, non-national registered charities which benefit the young or the socially disadvantaged.

The Company supports other initiatives. Among these are LEAP - Making the Leap runs careers education programmes for schoolchildren and delivers services that prepare young adults for life-changing career opportunities. The Company donates annually and Liverymen work at the centres assisting the charity.

Other charities supported are REACT - Rapid Effective Assistance for Children with Potentially Terminal illness and Pembroke House which is a multi-use community space in Walworth, south east London.

CUTLERS

The Company has supported education for hundreds of years, with a major proportion of its charitable giving being towards students and education, and this support has spread to a diverse range of schools, universities and colleges. The majority of the Company's awards are not solely based on academic excellence, but are heavily weighted towards addressing need.

The Company currently has active links with Archbishop Tenison School, supporting one student per year, every year, throughout their first degree course at University. They also award scholarships at the City of London School, City of London School for Girls, King Edward's, Witley and Reed's School.

The Company also funds scholarships for selected undergraduates at several Oxford and Cambridge Colleges, as well as a fine metalwork conservation scholarship at West Dean College, and two engineering scholarships, one at Corpus Christi College, Cambridge, and the other at the University of London. There is also an annual prize sponsored by the Company for engineering students at the City & Guilds of London Institute, and a scholarship in pure mathematics for a student undertaking post-graduate work, tenable at Corpus Christi College, Cambridge.

Given the Company's close relation with Surgical Instrumentation, there is also an annual prize for innovation in surgical instrumentation or techniques, and surgical fellowships to study abroad.

The Company funds three music bursaries, which are tenable at the Royal Academy of Music, the Trinity Laban Conservatoire of Music and Dance, and the Royal College of Music. Travel scholarships are awarded to students between 17 and 25, who wish to study abroad, for a minimum of 6 months, in order to acquire a second language and learn about another culture.

DISTILLERS

The Distillers' Charity awards Scholarships to outstanding candidates for: The Wine and Spirit Education Trust's Diploma and Professional Certificate in Spirits; The Institute of Brewing & Distilling's Diploma in Fundamentals of Distilling, The Institute of Brewing & Distilling's Diploma,

The Institute of Brewing & Distilling's Module 2; and Heriot-Watt University's MSc or Postgraduate Diploma in Brewing and Distilling. In addition, it is a regular donor to The Alcohol Education Trust ("AET"), a small focused charity which supports over 1,500 schools across Britain free of charge, educating 11-18 year-olds about alcohol as a means of equipping them to make safer choices as they get older and to reduce negative risk taking. The Distillers' Charity has also made a substantial strategic grant to the AET from the proceeds of its second charity auction, which has enabled the AET to start rolling out its educational programme into Scotland.

DRAPERS

The Company's involvement in education is wide-ranging and diverse and its role is promoting high quality educational and vocational opportunities at all levels of education and within the community, and encouraging aspiration and achievement among young people, particularly those from disadvantaged backgrounds.

It includes support for 16 independent and state schools and academies. These include Bancroft's School, Howell's School, Llandaff, Kirkham Grammar School, Blundell's School, Thomas Adams School, Wem, John Taylor High School and Sir George Monoux College. Current support for these schools is principally through providing governors drawn from the Company membership and financial support through a mixture of scholarships, hardship funds and leaving prizes.

Together with Queen Mary University of London as co-sponsor, the Company established the Drapers' Multi-Academy Trust. The current MAT schools, all located on Harold Hill in the London Borough of Havering, are Drapers' Academy, a secondary school with a Sixth Form, Drapers' Brookside Junior School, Drapers' Brookside Infants School, Drapers' Maylands Primary School and Drapers' Pyrgo Priory School. The Company provides governance support through the MAT and local governing bodies at each of the schools, financial support for extra-curricular activities, careers guidance through its membership, and outreach and access work with its Higher Education partners to encourage excellence, raise aspiration and ameliorate disadvantage.

The Company provides significant grants to a number of universities and colleges including Hertford College and St Anne's College, Oxford, Pembroke College, Cambridge, Queen Mary University of London and Bangor University. This support encompasses Fellowships, DPhil studentships, PhD studentships, and supporting the Colleges' outreach and access activities.

The Drapers' involvement in musical education includes bursary support to St Paul's Cathedral School as well as supporting postgraduate students at the Royal Academy of Music, the Royal College of Music, the Guildhall School of Music & Drama, Trinity Laban Conservatoire of Music and Dance, and the Royal Northern College of Music.

Its support for textile education includes, work experience opportunities for fashion degree students from Leeds University, technical training in the workplace and colleges, and promoting craft making skills. The Company also supports a post graduate Textile Conservation student at the University of Glasgow through the Textile Conservation Foundation. Much of the Company's grant-making is directed towards education and young people and in particular support for organisations which raise the aspirations of young people, enabling them to achieve their academic potential and improve their employability skills, particularly disadvantaged young people in deprived areas of Greater London.

Two other discretionary grant-making trusts of which the Company is trustee, Thomas Howell's Education Fund for North Wales and Sir William Boreman's Foundation, support educational initiatives and projects for young people in North Wales and the London Boroughs of Greenwich and Lewisham respectively. The focus of the support are

projects promoting student inclusiveness and educational opportunity particularly for those from a low-income, otherwise disadvantaged background or area of high deprivation.

DYERS

The Dyers support 4 schools: Norwich School, Archbishop Tenison, St Saviours & St Olaves, and Boutcher Primary school. Financial support is given for projects such as a new minibus or other equipment. Bursaries are offered at the three secondary schools and books are awarded annually to each pupil at the primary school. A science prize is offered at Norwich School. The Company also offers support as school governors, literacy mentoring, and general advice.

The Company supports work at 9 higher education establishments including colour chemistry education at two of them.

EDUCATORS

The Company has had overall responsibility for Livery Schools Link and is now the founder member of its successor Livery Schools Link Ltd. We have a bursary scheme in partnership with the City and Guilds of London Institute. We offer awards annually to outstanding teachers within the theme of 'Inspirational Educators' (this includes primary, secondary, further and higher education, vocational education and training, lifelong learning). We run a series of seminars annually on a particular theme in education and we also offer internal discussion evenings on current education issues. Both of these are open to members and attendees who are not members of the Company. Most members are still actively involved in aspects of education, often on a voluntary basis. A new scheme has been introduced encouraging members to participate in education support activities on a voluntary basis, especially in relation to the initiatives of Livery Schools Link and to school and college governance. Our Members Initiatives evening showcases innovative ideas and good practice in education from members of the Company. We organize a public speaking competition for schools in the London area and we also are the administrators for the Sheriffs' Challenge which is a team presentation event.

Together with Livery Schools Link and the Worshipful Company of Actuaries, we are closely involved in the organisation of the conferences to bring together school Head teachers and Livery Companies.

ENGINEERS

Through the good offices of its charity, the Engineers' Trust, the Engineers' Company supports engineering education and research. The Trust gives annual awards and prizes to support and encourage excellence amongst qualified engineers and those training to be Chartered Engineers, Incorporated Engineers and engineering Technicians. Annual Awards and Prizes are generally made to a timeframe to meet the Company's annual Awards Dinner.

The Trust's preference is to support education through organisations which have established schemes, rather than by adding to the wide array of options presented to potential young engineers and their

teachers. Accordingly, for a number of years the Trust has supported two Arkwright Scholarships per annum.

Since 2016, in partnership with the Institution of Engineering and Technology, the Trust supports the Engineering Horizon Bursaries Scheme to help more apprentices and students become engineers by making an engineering career more accessible to those who have had to overcome personal challenges to continue an engineering education. Each bursary runs for three or four years and each bursar is also paired with a Liveryman mentor from the Company.

The Leete Premium Award established in 2013 encourages excellence in the field of Manufacturing Research. Five awards have been made to date, each funding an outstanding new PhD student at the University of Cambridge's Institute for Manufacturing, for three years. It is probable that the host university will soon shift to Sheffield, in partnership with the Advanced manufacturing Research Centre.

Some of the Trust's engineering education related awards are as follows: The Cadzow Smith Award for excellence on an accredited undergraduate engineering course conducted at one of the eleven universities within London and the surrounding area; recipients must also demonstrate self-confidence, professional awareness, leadership and sound common sense.

The Mercia Award for a postgraduate paper describing how engineering techniques are being used for the advancement of medical treatment.

The Stephenson Award is offered to an educator who has been particularly successful in encouraging young people to study engineering with an emphasis, but not exclusively, on mechanical engineering.

The Platt Award encourages young people to pursue studies leading to a career as a professionally registered engineer, by a demonstration of excellence in gaining registration as an Incorporated Engineer in the preceding calendar year.

Looking to the future the Engineers Trust aspires to support awards and prizes in education: at the interface of the digital and physical engineering worlds, in areas delivering a lower carbon future and at the interface of disciplines, where systems engineering solutions enable the world's biggest challenges to be overcome.

ENTREPRENEURS

Since its foundation in 2014, the Guild of Entrepreneurs has been actively involved in the support and provision of business skills teaching and in motivating students to consider a career as an entrepreneur. The Guild's Education Committee is responsible for devising and maintaining the Guild's practical programme of entrepreneurship education, mentoring and leadership. Freeman Entrepreneurs from a whole range of backgrounds and experiences are engaged in activities to promote and sustain entrepreneurship as an academic discipline.

The Guild has built strong links with schools at secondary level (Roedean School in Brighton; Christ's Hospital School in Horsham; Duke's Aldridge Academy in Tottenham, and Kensington Aldridge Academy in Kensington).

A series of annual Roedean Enterprise Talks is an ongoing collaboration

with Roedean School to educate and inspire students to create and build businesses and hear from some seasoned entrepreneurs about their personal challenges and successes. In addition, Freeman have also participated in business studies “masterclasses” this year in subjects such as marketing and branding; digital businesses, and leadership, as well as acting as judges for the Year 9 Enterprise Day designed to stimulate interest in the business studies GCSE curriculum.

At Christ’s Hospital, the Guild brings together Freeman Entrepreneurs (particularly those who themselves came from families in “social, financial or other need”), Old Blues and current students at events to raise awareness of business opportunities in the City of London. A number of Freeman have this year visited the school to give talks and guidance to would-be pupil entrepreneurs, as well as offers of work experience during the summer months; and a programme of business learning for A-level economics students is planned for the autumn term 2018.

The Guild has again participated in the Sheriffs’ London Challenge (an inter-livery schools debating competition from within the Financial Services Group of Livery Companies). The Guild’s partner school Duke’s Aldridge Academy (formerly Northumberland Park Community School) reached the finals in the 2018 Challenge.

Freeman Entrepreneurs participated as social dragons in the “Summer of Opportunities” summer school programme at Kensington Aldridge Academy, situated directly under the Grenfell Tower. KAA also participated for the first time as one of the Entrepreneurs’ Schools in the Sheriffs’ London Challenge this year.

The Guild of Entrepreneurs has been collaborating with the Digital and Interactive Storytelling lab at the University of Westminster - matching MA video-journalism students with entrepreneurs for 6 weeks as mentors, helping them to craft a commercial offering from their design project.

New projects for the next academic year and beyond include:

- Collaboration with the University of West England Entrepreneurship department in liaison with Aldridge Foundation.
- Collaboration with the University of De Montfort Leicester in liaison with Brief Cases.
- Collaboration with London-based Chinese students and graduates in liaison with Mandarin Consulting.

Collaborations are also being considered with Young Enterprise and Cass Business School.

At London Business School, the Guild is closely involved with theoretical entrepreneurship at the Institute of Innovation and Entrepreneurship, and with practical entrepreneurship through the LBS Incubator (The House). Freeman Entrepreneurs are being placed as mentors to students and student businesses, as well as assessors and judges for pitching competitions.

The Guild of Entrepreneurs Charitable Trust made its first grant in 2018, supporting a PhD student - researching gender, learning and entrepreneurship in an anthropological context at University College London. Education is at the forefront of its programme of financial aid,

and applications from potential beneficiaries are encouraged. www.guildofentrepreneurstrust.org

ENVIRONMENTAL CLEANERS

Support is mainly provided through bursaries, prizes and contributions to general funds.

Prizes given at schools are for the students’ work in connection with the environment and those at the City & Guilds Institute are given for general learning and cleaning related subjects.

FAN MAKERS

The Company provides financial support and 2 governors to the Lansbury Lawrence Primary School in Tower Hamlets. 3 prizes are awarded to post-graduate students at Cranfield University and one school.

The main themes for education work are education in deprived areas and support for technical education in air movement. The Company provides a bursary to a Building Services Engineering student at London South Bank University.

FARMERS

The Company has two annual sponsorships at The Duchy College Cornwall and The Royal Agricultural University. Prizes are offered at 12 County agricultural colleges, at City of London Freeman’s school and City University.

A contribution is given to Surrey Docks Farm, Rotherhithe for educational facilities at the inner city farm. Sponsorship for educational visits is given to the charity Farms for City Children and also to the Farming and Countryside Education (FACE) charity, based at Stoneleigh, Warwickshire. Sponsorship is also given to two young farmers to attend the main conference on farming.

The main theme for giving is management and leadership.

Some Liverymen are School Governors.

Research is being undertaken into mental health issues in agriculture.

FARRIERS

Prizes are given to St Martin in the Fields High School for Girls, City of London School for Boys, City of London School for Girls, City of London Freeman’s School, City of London Academy and City Academy, Hackney. The Company provides a Foundation Governor at St Martin in the Fields High School for Girls, Tulse Hill. There are no restrictions on themes for prizes given.

The Company’s main involvement in education is with farriery apprentices, the Awarding Body that sets the qualifying examination for registration at the end of their four and a half year apprenticeship. In addition, we offer an award to one student from each of the Veterinary Schools in the UK to spend a week with a senior farrier towards the end of their course. The award covers travel, accommodation and any other expenses.

FELTMAKERS

The Feltmakers’ Company has an annual Hatting Competition which awards seven prizes ranging from £1500 downwards – the competition is open worldwide. They support Kensington & Chelsea College with an annual bursary to help students buy materials. They also support The City of London Freeman’s School, St Paul’s Cathedral School, specifically choristers, and King Edwards School Whitley. The Company has recently taken on support for ‘Cockpit Arts’ as well as several international and national hatting events. We have members who are Queen’s Hatters as well as many other skills related to the hatting trade.

FIREFIGHTERS

We are a young company with ambitions in the field of education and training. Work in progress

includes developing the relationship between the Trustees who fund grants and the Working Group bringing forward projects to be funded. We have helped with the cost of study materials where another charity funded the course fees for a second degree course. Certificates and prizes are awarded to cadets on fire & safety related courses. We anticipate being able to consider bursaries in due course

Our theme is fire safety and aspects of citizenship and World War II history.

Members are encouraged to be school governors. One liveryman is widely involved in lecturing and consultancy on fire risk assessment including liaison with head teachers, teachers and governors in a variety of educational establishments. A recent development has been the Youth Education Training and Support Initiative ‘YETI’. An annual ‘City Lecture’ has been successfully introduced with Fire Safety as a continuing theme.

FISHMONGERS

Education is a central focus for the Fishmongers’ Company, both in terms of our remit to promote a healthy, prosperous and sustainable UK Fish & Fisheries sector and as part of our wider charitable objectives.

We continue to play an integral role in the development of Billingsgate Market’s Seafood School, which educates some 9,500 chefs, fishmongers and members of the public each year. The Company has also recently established the Master Fishmonger Standard, rewarding excellence in the fishmonger trade.

Through our close links with academia, we promote an evidence-based approach to complex issues facing the Fish & Fisheries sector, including environmental management, sustainability and healthy eating. We support nominated MSc and PhD students undertaking fisheries and marine research and make grants to universities and other organisations engaged in these areas.

In a wider educational setting, we support medical students at University College London through the Elizabeth Garrett Anderson Scholarships and graduate students of the Universities of Oxford and Cambridge with the Mark Quested Exhibition.

Nurturing excellence in art and culture remains a key concern for the Company and we award scholarships at the Royal College of Music; the Royal Academy of Music; and the Guildhall School of Music and Drama; together with a Sculpture Prize at the City and Guilds of London Art School and a music scholarship at the St Paul’s Cathedral School. Gresham’s School in Holt remains one of the Company’s longest-standing beneficiaries. Bursaries for students are the principal focus of this support (via the Gresham’s Foundation), however, the Company has occasionally funded capital projects and provides a number of governors. We are also interested in helping to promote partnerships between state and independent schools and wider projects seeking to encourage access to, and excellence in education.

A growing interest in innovative approaches in education and promoting social mobility has seen us support bursaries at the New Model School (two London schools providing low-cost independent education for children aged 4-11), utilising a new challenging knowledge-based curriculum.

Following a recent review, we are looking to further focus our charitable giving. London-based organisations providing education in prisons, promoting public knowledge of food and nutrition and addressing mental health in an educational context will be of particular interest to the Grants Committee.

FLETCHERS

The Fletchers’ Trust, whose main charitable activity is to support archers with disabilities, including to Paralympian archers, through the provision of specialist equipment, The Trust and Company support the City of London Academies at Islington, Southwark and Hackney, as well as the City of London Freeman’s school by giving prizes and arranging visits. Individual members of the Company.

Serve as Governors of CLS, CLSG, CLFS, and of City of London Academies Trust; as well as other local schools. We support the Guildhall School of Music and Drama by using their students to perform at our events. We also offer mentoring and specialist help to some students via our connection with Southampton University. The Fletchers’ Trust has also supported Samuel Rhodes School. In 2015-16 the Company arranged an essay competition for the City of London Schools to celebrate the 600th Anniversary of the Battle of Agincourt. The Trust also sponsors an apprentice at Mudchute City Farm.

FOUNDERS

The Company offers a number of bursaries: five travel bursaries to Barts and the London School of Medicine and two to University College Hospital along with thirteen bursaries in Material Science Courses at London, Manchester and Birmingham Universities. One full bursary and four music scholarships at the City of London Girls’ School are funded as well as two presentee governor student places at Christ’s Hospital.

A chorister at St Paul’s Cathedral is sponsored.

At John Warner School, through the Smallpiece Trust, over eighty

students are given hands-on engineering experience.

Sundry art awards are offered at schools and universities.

Continuing support has been offered to Treloars School, a non-maintained special school for students with physical disabilities.

The over-riding themes for education awards are Materials Science, Music and Art.

Governors, student mentors and work placements are also offered through the Company.

The Founders support the Globe Academy and the Access Project, which aims to raise aspirations in inner London schools: support takes the form of finance and mentoring.

FRAMEWORK KNITTERS

The Company has been a keen supporter of students interested in the knitting industry since the inception of our Bursary Awards Scheme in the 1980s, which provides Bursaries (currently £2,500) and Awards (currently £1,500) to final-year undergraduate and post-graduate MA students studying one or more aspects of knitting at various universities. Visits in 2018 to interview over fifty students across nineteen UK colleges culminated in the presentation of nineteen Bursaries or Awards, and we continue to seek out other colleges and universities where knitting technology and/or design is taught.

We have been working closely with the apprentice scheme of City & Guilds since 2008 and created a liaison with Cockpit Arts in 2014. In 2015 we supported our first apprentice in the National Theatre's Costume scheme, and are currently supporting our third apprentice at The National Theatre. More recently we have sponsored an apprentice at the Ruddington Framework Knitters Museum in Nottingham.

While a career in textiles and knitting is well below the radar of many schoolchildren and their career advisors, we have been delighted to take part in the Livery School Link workshops at Guildhall to showcase the range of knitted products, and school children have been amazed at the development of technology and the use of knitted goods e.g. for medical procedures, personalised trainers and Formula 1, as well as the better-known traditional knitted garments.

We believe there is a growing need to develop technicians and craftspeople in those areas in order to provide the infrastructure in which the many creative designers can turn their concepts into reality. To encourage students to consider an appropriate textile-related career, particularly in the design and maintenance of textile machinery, we are delighted to have recently agreed to run a joint initiative with Shima Seiki Europe Ltd. Undergraduates from three UK colleges will undertake a two-week training course at Shima's European Headquarters in Castle Donnington. We are sure it will be of great benefit to the knitting industry as it will significantly improve technical knowledge, ability and employment prospects.

FREEMEN

The Guild supports the presentation of two students at Christ's Hospital. Annual donations of varying amounts are given to the bursary funds

at various schools: City of London Freeman's School, King Edward's School Witley, Reed's School, Treloar's, Guildhall School of Music and Drama, City of London School and the City of London School for Girls. Prizes are given at some of these schools and at St Paul's Cathedral School. Awards are made to enable needy students to participate in school trips and other education related activities, for example the Tall Ships Race. The focus is on supporting educational institutions with a link to the City of London, the strongest link being to the City of London Freeman's School. A cup and a prize are awarded annually to the City of London Academy in Southwark.

FRUITERERS

Through its Awards Council the Fruiterers Company enhances its impact on the fresh produce sector by fulfilling the Company's objectives one of which is by supporting education.

From time to time the Company supports a scholar from the Nuffield Farming Scholarships Trust who wishes to study a fruit related subject. The programme provides funds and opportunities to enable the scholar to travel all over the world to gather knowledge and information from international leaders in their study subject. The aim of a Nuffield Scholarship is to transform that worldwide experience into practical improvements for the UK Fruit Sector. To apply for a scholarship, visit www.nuffieldscholar.org.uk.

The Company is eager to encourage new entrants into the Fruit and Fresh Produce industry. To this end it can offer financial support to those who actively promote careers in the sector to school leavers and college and university students.

Prizes are awarded annually to outstanding undergraduate Master's and PhD students who have evidenced an interest in fruit (as defined botanically) and expressed a wish to develop a career in the fresh produce industry. The process is competitive. Students submit a personal statement and details of any relevant work, experience and/or interests in fruit and fruit products. Applications must be supported by a reference from the student's course tutor. Applications are assessed by a group of experts including those from academia, applied research and the fruit and related industries.

The land-based colleges and universities participating in the scheme include Hadlow and Kew and the universities – Writtle, Harper Adams, Cranfield, Nottingham, Royal Agricultural, Reading, Warwick and Greenwich.

To celebrate the bi-centenary of the Bramley apple in 2009, the Company developed a programme of planting Bramley trees in the grounds of many inner London schools. A teaching pack was developed to accompany these plantings that children and their schools receiving the trees could learn about them and how to use the harvest they produce. The pack is available to download from www.fruiterers.org.uk.

FUELLERS

The Company is expanding its links into education in order to encourage students to undertake science subjects at school and college, with a

view to joining the energy industry. This is being conducted through newly formed affiliations with three charities: WISE, Teen Tech and Generating Genius. We are in the process of making arrangements to offer work placements and mentoring. The Fuellers already support Platanos College in the form of an annual donation and help with specific requirements such as the purchase of a mini bus. We have one Arkwright Scholar and are looking at ways to increase this kind of support through the charity affiliates.

FURNITURE MAKERS

The furnishing industry needs a skilled workforce in order to maintain a competitive edge in today's global market.

We have created a wide ranging education programme to develop young talent for the future, which supports school children right through to young professionals.

From awarding design prizes that raise awareness and reward talent, organising a dedicated exhibition to showcase work from young designers (90 participants in 2018) through to giving grants to universities and colleges (20 in 2018) and scholarships to their students, our educational programme is all-encompassing.

To give students and young professionals a deeper understanding of the industry, we organise unique tours and seminars, covering raw materials and components through to design, purchasing, manufacturing, pricing, marketing, merchandising and retailing. This year we are taking 30 undergraduate students to visit six companies over four days and hosting a five-part seminar roadshow. Our Young Professional Industry Experience will give eight aspiring young people a unique three week intensive programme, visiting 19 companies across the UK.

For those studying design, the Frederick Parker Collection of chairs, housed at London Metropolitan University, covers 300 years of British furniture making and design, and is an invaluable educational resource for students to understand the heritage of the industry.

Because we know help is needed to forge careers, we have developed mentoring and apprenticeship initiatives as well as a portal to support people to find training and education courses around the country.

In 2017 we relaunched the Master Certificate Scheme, organised in partnership with City & Guilds, which aims to recognise excellence and promote career progression from Apprentice to Journeyman and Master level. www.furnituremakers.org.uk/education

GARDENERS

The Worshipful Company of Gardeners (WCOG) has its origins in the medieval guilds which exercised control over their particular crafts in the City of London by ensuring proper training through apprenticeships. Today it continues to support the art and craft of gardening as well as all aspects of horticulture, including arboriculture, nursery production, landscape/garden design, construction, maintenance, sports and amenity turf management, care and management of parks and gardens, leisure and recreation provision, sports facilities, horticultural research and heritage conservation.

The WCOG supports two apprentices with assistance from City & Guilds of London.

Each year, we award prizes for horticultural excellence to students from colleges including RHS Wisley, Capel Manor, Writtle and Kew Gardens.

We also award The Prince of Wales Trophy for sustainable horticulture and The Prince Edward Trophy for excellence in horticultural career development.

The Company focuses on education and career development through four distinct initiatives:

1. Livery Schools Link Showcase: this is a City Livery Company initiative that showcases the various livery trades and the job opportunities that they can provide. The WCOG is developing a programme of careers advice available to schools through visits and the provision of relevant information. We participate in the annual Livery Schools Link Conference and in their showcase event at Guildhall. Participating students have the opportunity to meet commercial representatives who can offer career and further education guidance.

2. Future Gardeners Project: a fully funded scheme run in partnership with The Bankside Open Spaces Trust and the Royal Parks Guild. The Project provides short pre-apprenticeship training for young and disadvantaged people, exposing them to the many possible careers available in horticulture through a free, 10-week course run three times a year. Broad training, practical experience, CV preparation, site visits and interviews, prepare students for work. A high proportion of participants have gained paid employment after completing this programme.

3. Masterclasses and workshops: these are open to apprentices and trainees from a range of organisations along with WCOG's prize winner's alumni. These are run in partnership with the Royal Parks Guild and have included working on an intergenerational project at the Royal Hospital Chelsea, assisting with the build of a garden at the Hampton Court Flower Show and going behind the scenes at Kew Gardens. Supporters include the RHS, Kew Gardens, RHC, London in Bloom and other professional bodies and organisations.

4. The Nuffield Foundation Horticultural Scholarship: we are working with the Nuffield Foundation to fund candidates with a proposal to research a horticultural project. The WCOG, in partnership with the Worshipful Company of Fruiterers, is currently supporting a Nuffield Scholar.

GIRDLETS

The Girdlers' Company was involved with the making of girdles (or belts). It no longer practises its craft although it has the honour of presenting the girdle and stole worn by the Sovereign at each coronation. The Girdlers' Company Charitable Trust supports four students at the Royal School of Needlework, a chorister at St Paul's Cathedral School, a student at King Edwards School, Witley and three students at both the Guildhall School of Music and Drama and Gordon's School. A Girdlers' Scholarship is offered at Corpus Christi College Cambridge and a

Fellowship at Green Templeton College Oxford, both to outstanding New Zealand students. The Company has extended its reach to connect with its historic craft through higher education and provides a bursary to study at the Institute of Creative Leather Technologies and has sponsored the inaugural belt making competition both at the University of Northampton. The Company also supports the London College of Fashion's Making for Change project based at HMP Downview.

GLASS SELLERS

The Glass Sellers' Company through its charity fund supports education with bursaries and prizes at City schools, through the Abbott Scholarships, and with awards to college students taking courses on the art, craft and science of glass.

Additionally, the Company has for over 20 years financed the Glass in Society Scheme (GIS) in various areas of the UK. The aim of this scheme is to encourage students to study science and technology through the medium of glass. Under the GIS scheme, schools propose projects involving glass in some form, studying aspects such as the thermal, refractive, insulating, and light transmitting properties of glass and the application of these in areas as diverse as biology, food production, space, medicine or structures. Many of the projects lead to CREST Awards. When considering GIS proposals the Trustees' primary concerns are the needs of children and society.

GLAZIERS

The Company, through its charitable arm The Glaziers Foundation, supports education and training in stained and architectural glass art, design and technology; and in architectural glass art conservation and maintenance. We offer scholarships and awards (comprising annual funded work-placements: these are the 40-week Award for Excellence, the 10-week Ashton Hill Awards, and the biennial Travelling Scholarship) for students in further & higher education and for emerging professional glass artists. We are members of the Livery Company Apprentices Scheme (LCAS) and have developed an apprenticeship framework in architectural glass art & design, conservation and maintenance. Since 1972, the Company has organized and funded the annual Stevens Competition, which gives student and emerging glass artists and designers the chance to win a real-live commission, together with cash prizes. It is believed to be the only glass art competition of its kind in the world and competition entry is an integrated part of the syllabus for students on the undergraduate course on glass: architectural art at University of Wales Trinity St David (UWTSD). We also helped establish and support the Reflections of the Lord Mayor (ROTLM) organization's annual competition, for up to Year 6 students in and around the city of London and South London Sea-cadets' units, to design a stained glass roundel. Finally, we offer annual awards for the South East Area Cadet forces, a choice influenced by their location on the South Bank, which is in close proximity to Glaziers Hall.

GLOVERS

The Company commits just over half its charitable funding in support of deserving students at all 3 levels of education; St Pauls' Cathedral School, King Edward's Whitley, CLS, CLSG and the London College of Music. In addition, the Company have a close relationship with the City of London Academy Islington and the London College of Fashion. This mainly involves the secondary education of children, whose family circumstances would otherwise preclude access to this type of education. In the case of the London College of Fashion the Company funds a glove making masterclass and also sponsors annual competitions in glove design and safety poster design awarding prizes to successful students.

GOLD & SILVER WYRE DRAWERS

The Company provides funding for several bursaries at the Guildhall School of Music and Drama (post graduate opera student), the Royal School of Needlework (degree course) and for a Choristership at St Paul's Cathedral. It also provides funding for annual prizes at the City of London School, King Edward's School Witley and the Royal Ballet School prizes to individuals within affiliated Armed Service units as well as financial support to two Cadet organisations. The company also provides financial support to the Goldsmiths Craft and Design Council and other organisations for prizes in the use of gold and silver wire in jewellery making and the use of gold and silver wire or gold thread in textiles.

GOLDSMITHS

The Goldsmiths' Company Charity has continuously supported charitable work in education since the sixteenth century. Each year the Education Committee awards and administers grants to organisations with reach and impact, particularly those within the STEM and literacy areas.

The Company continues to support online initiatives in primary schools through the National Theatre's 'On Demand as well as In-Schools' streaming service and Imperial College's 'Reach Out Reporter' which takes teaching and resources created by science news stories into primary school classrooms – both projects are free to schools and students. The Charity continues to underwrite the costs of a specialist maths teacher through the Cedar Federation which aims to raise maths standards in three primary schools in Gravesend, Kent - the schools have all made a marked improvement in the two years the project has been running.

The Goldsmiths' Grants for Teachers is in its 11th year and encourages teachers and head teachers to undertake an original project of their choice, in the UK or overseas, aimed at enhancing their personal and professional development - up to seven grants are awarded each year.

The Charity supports: an access programme with Pembroke College, Oxford for State secondary school students from Manchester and the North West; a Special Education Needs and Disabilities programme with the Museum of London, the Duke of Edinburgh's Award Scheme

in Plymouth and Wales, the Royal Society's Student Conference and a science outreach programme with Winchester Science Centre and Planetarium.

Bursaries are given to: up to five Guildhall School of Music and Drama post graduate students; up to 12 BMA Medical Bursars reading medicine as a second degree; a St Paul's Chorister and a secondary school pupil supported through the Royal National Children's SpringBoard Foundation. A variety of prizes and bursaries are awarded each year in connection with the trade and 26 Goldsmiths' Company apprentices are currently being supported.

In 2019 the Goldsmiths Company launched the first ever Goldsmiths' Company Community Engagement Awards for Schools. The Awards celebrate the positive impact schools and their students have in their local communities through charitable and voluntary initiatives. These activities are of vital importance to their education, but often go unrecognised.

GROCERS

The Grocers Company is directly involved in providing the following assistance:

Oundle School: governors, capital funding, bursaries and scholarships as well as meeting and event space; Henry Box School: governor, capital funding and event space; The Elms School: governor, capital funding and an annual grant; Mossbourne Academy: an annual grant and 13 governorships for it and related schools; Christ's Hospital: a donation governor and the right to present up to 6 young people for Presentations; City & Guilds of London Art School: a trustee and 4 scholarships; City & Guilds of London Institute: a representative governor and appointed council member, as well as an annual donation; City University: an ex officio to the University Council; Royal College of Art: a member of College Court and bursaries; Imperial College London: 4 scholarships; University College London: 4 scholarships; Guildhall School of Music and Drama: annual scholarships; City of London School for Girls: an annual bursary; City of London School: an annual bursary; City of London Freeman's School: an annual bursary; St Paul's Cathedral School: an annual scholarship; Reed's School: an annual bursary and event space for the Foundation. In addition, we have a funding stream to support education costs for children of Freeman where the family income is under a set level. The scheme is reviewed each year.

The Company organises a mentor evening for A-Level students from two London academies where the students meet young Freeman and Liverymen who have careers in areas in which the students have expressed an interest. They converse about future career goals and practice interview skills. We also organise the "Grocers' Academy Awards" which pairs Lower 6 students from three London academies with younger Freeman, working in finance and marketing, who act as business mentors. These teams work together to develop a product which is then pitched at an evening event at Grocers' Hall to a panel of high profile judges from the worlds of marketing and finance.

We aim to continue with the mentor evening and the academy awards

as well as placing more governors in schools and academies across the country.

GUNMAKERS

The Gunmakers' Company Charitable Trust awards bursaries to support traditional gunmakers in their employment of apprentices. These trainees are taught the art and technical skills required in gun making, which helps keep the industry and in particular the heritage crafts alive, whilst at the same time producing a high quality world class product. A trustee is appointed to mentor each apprentice and to monitor his or her progress. 14 recipients have completed their apprenticeships since the scheme was introduced in 2007, and a further five are currently in training. They may apply for the award of Gunmakers' Certification on completion and the candidate reaching the highest standard of excellence annually will be presented with the McMillan Trophy and silver medal.

HABERDASHERS

The Haberdashers' Company founded its first school in 1594 (Bunbury Aldersey Primary School in Cheshire). The Company is now responsible for the education of over 12,000 children in a mixture of private and state schools and academies. A number of the schools are owned by the Company through their respective Foundations: Haberdashers' Aske's Boys' and Girls' Schools at Elstree; Haberdashers' Monmouth Schools in Wales (and their attendant prep, pre-prep and nursery schools) and Haberdashers' Adams Grammar School, a Selective Converter Academy, in Newport, Shropshire. In South East London the Company is the sponsor of the Haberdashers' Aske's Federation Trust, a multi-academy trust of four: Hatcham College (an old Haberdasher school, previously a CTC), Knights Academy, Crayford Academy and Borough Academy (a new free school opening in September 2019) – and five feeder primaries, including one at Hatcham which is co-sponsored by the Temple Grove Trust. Finally, the Company is co-sponsor of the Haberdashers' Abraham Darby Academy in Telford, which is federated with Haberdashers' Adams Grammar School. The Company controls its schools and academies through governance, and it currently provides the Chairmen of Governors and the majority of governors from the Livery. The Company is delighted to be able to provide scholarship and bursarial support across its schools and on to tertiary education. About 50 university bursaries are awarded every year, with the Company currently supporting over 180 students at university. The Company is in the final stages of partnership with AkzoNobel, which generously funds the AkzoNobel/Haberdashers Science Scholarships, designed to support a number of STEM students through university, and the Company is hoping to replicate this programme with other industrial and business sponsors. Elsewhere, the Livery supports students at the Royal College of Art, the Royal School of Needlework, the Guildhall School of Music and Drama, the University of East London, Barts and the London School of Medicine and Dentistry, and King's College London School of Medicine at Guy's, King's and St Thomas' Hospitals.

The Company has focussed for some years on its careers initiative, which recognizes that education is not an end in itself, but a means to an end. The aspiration is to develop a range of activities around careers, from careers advice and mentoring provided by members of the Company, to apprenticeships, internships and other routes into worthwhile and fulfilling employment. The Company welcomes the interest of other Livery Companies which may be closely connected with a modern trade or profession and which would like to partner with the Haberdashers in developing this initiative. The Company is very grateful to the Livery Companies which already take part in the annual Monmouth Enterprise Initiative, founded by Lord Ezra, which introduces students from our schools to a range of careers in the City.

HACKNEY CARRIAGE DRIVERS

Our affiliate school from 2008 was the Royal Docks Community School in Newham, but we have now joined the Burnt Mill Academy Trust as of the 1st of January 2018, so the school is now known as The Royal Docks Academy. One of our past Masters is vice chair of governors and it was the governors who actively sought the tie up with Burnt Mill that is rated as outstanding by Ofsted and has a teaching academy within the trust. This is all about getting the best outcomes we can for what is a very diverse school in a poor area of London, but having students who are really keen to succeed. Royal Docks really represents an excellent example of the ideal way to make our multicultural country work in harmony as happens every day in our school.

The main thrust of the Company's effort is around career development and aspiration. Over the last 2 years we have had over 50 different speakers visit the school, organised special visits to Livery Halls such as the Barber Surgeons focusing on the medical profession and of course have attended the Livery Showcase event at Guildhall. We do not have a lot of money to spare, but such funds that we do have we use to help motivate students by, for example giving gliding lessons to the top 10 science students or providing cash for rewards for students' success, particularly those who make real progress rather than just the brightest. Becoming part of an Academy means that instead of just one school we are now linked to 9 other schools. This would have been quite a challenge for the Company so we have sought to spread the load by joining forces with the Worshipful Company of Wheelwrights, whose Court recently agreed to affiliate with Burnt Mill Academy. This way we can help each other become more effective at what we do with these affiliations for the benefit of a much wider number of students from primary to 6th form. This is still the beginning of our journey and we still have much more to do to ensure the livery is a force to be recognised in education.

HORNERS

Salter-Horners Advanced Physics. [SHAP] Together with the Salters' Institute, the Horners have supported the development and maintenance of the context-led A Level Physics syllabus formulated by the University of York. We are now supporting York in their work to meet the new

curriculum specification due to be introduced in 2015.

Polymer Study Tours. Since 1987 the Horners have devised, participated in, and arranged industry support for these unique 3½ day courses for science, design and technology teachers. Each summer term, 3 groups of 20 teachers are taken to 3 universities [Edinburgh Napier, Manchester and London Metropolitan] and given lectures, laboratory sessions, and factory visits. These intense tours are widely acclaimed and have given almost 4000 teachers much valuable teaching material. Many London teachers have attended.

Polymer CPD. Started in 2013, they are a one day course using the same principles as the Polymer Study Tours. The successful pilot CPD was repeated in Southampton in early 2015, and other locations are currently being researched.

BSA CREST Star Activities. BSA is part funded by BIS, and create challenging materials for all levels of science education. After working

with them to create a successful classroom activity, a second package for junior schools has been created and was launched in September 2014.

The Science Opens Doors project was researched by the Horners' Company and jointly prime funded with the Mercers' Foundation, and now supported by the Tallow Chandlers. It is unique in bringing children, their parents and teachers together to carry out simple investigations in the classroom, and then linking school science with careers from science through presentations and take-away literature. The project is based upon impressive research by Kings College, London and The Science Council. Other Liveries are invited to participate in this project. The Company sponsors several awards for modern design and excellence in innovation. The Fashion & Jewellery Award is for design by students of London Metropolitan University. The most prestigious is the Student Design in Plastics Award, open to all UK Design students. A short list is selected from over 100 entries, and winning candidates

receive prized industrial placements. Recent winners have been from the University of the Arts and Glasgow College of Art.

Bursaries are awarded to students at City of London Girls School, City of London School, City of London Freeman's School, and Guildhall School of Music and Drama.

HR PROFESSIONALS

Included in our main objectives as a Guild are education and development activities to support people through and within the profession. In 2018 we established the national Leadership Foundation, with an academic board headed up by our Past Master, Jacqueline Davies and representation from our professional body, the Chartered Institute of Personnel and Development. The programme, which is aimed towards those on the cusp of achieving director status within the world of commerce, public sector and the third sector is run over a 12 month period. The structure of the programme is a blended learning experience of formal teaching, assessed assignments and each participant being assigned a mentor. Examples of the topics covered are corporate governance, business and organisational ethics, reward, talent and personal leadership development. The formal teaching is provided by a mix of senior professionals operating at the top of HR, academics and other specialists i.e. occupational psychologists.

Participants gain access to the programme through an application process which must be sponsored by a senior leader from the participant's organisation. The charitable trust of the Guild sponsors two applicants where the individual is suitably qualified but the organisation is unable to secure appropriate funding.

The medium term objective for this programme is to receive accreditation by both our professional body and/or a recognised business school through the NVQ structure and organisation.

Other educational activities undertaken and provided by the Guild are a series of seminars on topics to support continuous learning for HR professionals, and examples of such seminars are neuro-psychological diversity, the impact of digitisation on our profession and organisations generally.

INFORMATION TECHNOLOGISTS

Information Technology (IT) can transform the learning process. We apply our IT management and entrepreneurial skills to promote equal access to learning and to help educational organisations improve the learning experience.

We focus in particular on the two schools that we support, the disadvantaged and on promoting best practice in the use of ICT in schools. We aim to make the most difference by concentrating our efforts on a small number of high impact projects.

Our focus is IT in its broadest sense. We aim to encourage more students into Science, Technology, Engineering and Mathematics studies/careers and generally increase the awareness and competent use of IT across the whole student population. Additionally, we are much involved in influencing curricula to ensure that UK educational establishments are

providing the right IT/Computing skills to industry in order to improve the global competitiveness of the UK.

Hammersmith Academy is co-sponsored by the Information Technologists' Company (WCIT) and the Mercers' Company, having opened its doors in September 2011 with an intake of 120 Year 7 students and 120 Sixth Formers. The WCIT set up a £1M endowment fund to support key activities that make a real difference to the quality of education, but which cannot be supported from the core budget. The school has a specialism in digital media and technology. WCIT provides governance support for this innovative school and we aim to have a major influence in shaping its specialist curriculum and learning environment. We support the mentoring programme for Sixth Form students by providing experienced IT and business professionals, who offer advice on careers, academic choices and challenges and University applications. We also provide regular talks from leading industry figures to raise awareness and aspirations.

We have supported Lilian Baylis Technology School in Lambeth since October 2002. In January 2005, Lilian Baylis was awarded specialist school status and changed its name to Lilian Baylis Technology School (LBTS). The WCIT was actively involved with the process and, along with the Mercers' Company, provided the funding required as part of the application for specialist school status. While providing a mentoring service for the sixth form, the main focus of our work is to raise students' aspirations by giving them insights into a wide range of business and professional careers and linking these to the academic requirements for developing such a career path. WCIT supports the school's annual careers fair including bringing in high-profile companies like IBM, Prudential and Microsoft. We have also arranged work experience placements, visits to businesses and meetings with leading business figures. We regularly host lunches at our Hall for groups of KS3-4 students. Alongside this work the company has advised the school on ICT issues and provided governance support.

We provide a number of members to the IT/Computing Industrial Advisory Board of the Open University for determining the undergraduate curriculum strategy. We have an established "WCIT Technology Award" whereby seven universities, including City University, are invited to nominate a student (undergraduate or postgraduate) for this annual prize.

We are active members of Livery Schools Link; we set up group visits (e.g. the Innovation Warehouse) for students; we work with Accenture through their excellent schools' workshop programme to encourage more girls into STEM related subjects/careers; we organise debates on important issues such as schools' Computer Science curricula; we work with eSkills UK (the Sector Skills Council for IT) to encourage students to consider careers in Cyber Security through their Secure Futures programme. We have a joint working party with the Worshipful Company of Educators which is exploring with EHRC (Equality and Human Rights Commission) on how we can provide guidance to schools on the Equality Act 2010 in the context of using IT to ensure disabled students are not disadvantaged.

INNOLDERS

The largest portion of the Innholders' Company educational funding supports training and development at tertiary level and beyond in hotel and business management subjects through courses at the International Hotel School in Lausanne, at Cranfield School of Management and at Cornell University. These are provided in conjunction with the Savoy Educational Trust, the Lord Forte Foundation and the Master Innholders' Charitable Trust.

The Company maintains a link with the Licensed Victuallers' Schools which dates back over 130 years, where it provides grants, bursaries and prizes within the main School at Ascot and supports projects at the two schools (Hassocks and Oxford) specialising in providing education to young people with a diagnosis on the autistic spectrum.

The Innholders provides scholarships at the two City of London Schools, match-funded by the City of London Corporation and it also supports bursaries at various schools throughout southern England. In addition, the Company provides on-going grants to Teach First for STEM teachers working in the London boroughs of Tower Hamlets, Newham and Southwark.

Wider philanthropic activities include the funding of musical education through the provision of bursaries at GSMD, at St Paul's Choir School and the Mayor's Music Fund, and broader educational projects with the Royal Academy of Culinary Arts Adopt-a-School programme, the Springboard's Kickstart Foundation, and Jamie's Farm.

Several members of the Company are involved in school governorships in their own home areas.

INSURERS

The Worshipful Company of Insurers (WCI) is a supporter of the work of the Brokerage Citylink, a charity which works in partnership with schools and City companies to raise the aspirations of young people from London state schools, and give them the knowledge, skills and experience to access business and finance careers. The Company supports the Brokerage's work with an annual grant for core costs and with the skills and time of their membership for the delivery of the City Careers Programme and. The Brokerage works with over 7,000 young Londoners, from primary school to alumni who are now working in the City, engaging 105 businesses and is in partnership with 130

schools. Specifically, the Brokerage offers a range of services to schools including City visits, employability skills workshops, representing the City at career conferences and events, mock interviews and assessment centres, and access for students to internships and work experience at prestigious City businesses. www.thebrokerage.org.uk

The WCI funds the Brokerage Citylink's City Careers Programme which supports hundreds of undergraduates who attended London state schools and want to work in the City by keeping them regularly informed about City opportunities and offering them master classes in City specialisms. As part of the programme in 2014, the Brokerage piloted a City Careers Conference with 200 school leavers and undergraduates from state schools meeting 17 City employers. It was a great success. This summer will also see the 6th annual WCI Networking Event which gives ambitious students the opportunity to network with members, develop their communication skills and understanding of the City and insurance, and forge connections with professional mentors and contacts.

INTERNATIONAL BANKERS

Although the Company (WCIB) provides some scholarships and bursaries for historical reasons, this is not a practice which philosophically we seek to promote at secondary school level. Our emphasis is increasingly to try to make a difference to the many rather than the few and to involve our membership in this as much as possible.

For example, in 2014, 16 London state secondary schools participated in the WCIB schools competition, run in conjunction with the charity Brokerage Citylink. Students in years 12 and 13 were invited to write an article on "Does the UK as a whole benefit from London's pre-eminence in financial services?" Apart from cash prizes awarded both to students and participating schools, this year the winners also had the opportunity for work experience arranged by one of our Liverymen. For older students and building on our international outlook, the WCIB provided funding for two Mansion House Scholars and mentors for all the scholars. The WCIB has relationships with approximately 20 business schools and awards the WCIB prize for the best dissertation at these schools. The winners are then eligible to compete for the Lombard Prize where not only is their written work examined but they are asked to respond to questions on ethics, finance, economics and the City.

Our approach has the following aims: improving financial literacy and general education, not simply providing financial support; improving employment prospects in the City and for school leavers who would not otherwise aspire to a City job; encouraging aspiration generally e.g. by inviting competition winners to a City function and by involvement of our members at school events; educating students about the profession and the City.

We make the most of our funds by channelling a significant proportion of them through one umbrella charity, The Brokerage Citylink, in order to leverage off its considerable resources and network. In 2014/15 we continue to support their 'Working in the City' and 'The WCIB City Experience' programmes, to which a number of members have also

generously provided facilities and their time. These programmes are important in that they reach schools in 15 London boroughs at no cost to the participating schools.

In 2015/16 the Company is supporting an enterprise initiative via a joint programme between two of our strategic partners, the charities MyBnk and ARK, which comprises running the MyBnk Enterprise-in-a-Box programme in a number of ARK schools. A similar programme which we sponsored in 2013/14 reached over 1250 London based students.

IRONMONGERS

The Company nominates Foundation governors and gives financial support to Sir Robert Geffery's Primary School, Landrake, Cornwall. There are partnerships with nine Church of England primary schools in areas of high deprivation across England, providing funding and other support. The Company funds 5 presentations to Christ's Hospital School and 2 choristerships at St Paul's Cathedral School.

The Company provides a bursary for one student at King Edward's School Witley, one at City of London School for Girls and a scholarship for one student on an opera course at Guildhall School of Music and Drama. Non-financial support is given to head teachers of partner primary schools. The Company was a founder partner of RISE!, a London schools STEM project for Years 10 to 13

JOINERS AND CEILERS

In addition to providing prizes for woodwork in schools, the Company sponsors prizes at the City & Guilds of London Institute and the City & Guilds of London Art School. It organises annually a practical competition for students in the fields of both joinery and carving with significant cash prizes. This competition is advertised nationwide with students from all over the UK attending to compete.

LAUNDERERS

Our Company's education trust directs its support to industry specific projects such as management courses and travelling scholarships for the continuing education of those employed in the industry. We are also examining ways by which we can give support to apprenticeship schemes. We may be launching an initiative in 2019 to present a child to Christ's Hospital School.

LEATHERSELLERS

Education is one of the key priorities of the Leathersellers' Company and has been throughout our existence; the first university exhibition was awarded in 1604. The Company plays a significant role in the governance of Colfe's School in which we are the sole shareholder and the Leathersellers' Federation of Schools for which we provide a substantial number of governors. Across the 6 schools there are over 4,000 pupils from 3 – 18 years old. The Company also provides these schools with significant annual grant funding and awards for students, included means tested scholarships into Colfe's 6 form. The Company provides substantial long-term grants to a number of universities

and financially supports scholarships, bursaries, fellowships and chairs. The universities currently supported include: St Catherine's College, Oxford, Fitzwilliam College, Cambridge, London College of Fashion, De Montfort University, The University of Northampton, City University, Nottingham Trent University and Central St Martin's College. The Company provides grant funding to charities working in the field of education and through its main grants programme funds a number of mainstream and special education needs providers. A third of annual grant funding awarded is in the field of education. In addition to the prizes, bursaries and scholarships mentioned above which are awarded through educational establishments in question, university students can also apply to the Leathersellers' Company directly for financial support. The Company provides university grants for up to 4 years to full time students at any UK university. On average 40 new students a year receive financial support from the Company in this way.

LIGHTMONGERS

The Company maintains a close affiliation with two remarkable schools, Mary Hare for Deaf children (Newbury), where members have been governors over many years, and New College Worcester for blind and partially sighted children. Their work on sensory disabilities has a direct link with our primary charitable objectives. Both schools are national charities, attracting children from all around the UK. As well as direct financial support, we encourage them to join in our activities, a highlight of the children's' year being to parade with us in the Lord Mayor's Show. In collaboration with their science teachers, we run an annual science & technology competition with prizes for the most innovative entries from each school and the head Boys and head Girls each year attend a court dinner where they receive prizes.

With over 20 education awards, Lightmongers maintain affiliations such as an Air Cadet unit and a Sea Cadet unit. Others reward qualifications relating to the profession through UCL Bartlett, London South Bank University, Brunel University, Rose Bruford College and the Lighting Education Trust

Beyond initial qualifications, the Company has a successful journeyman scheme, designed to encourage young people under 30 years of age entering the industry through a three year period of mentored career development. This leads to the Freedom of the Company 'By Servitude', thus giving them the opportunity to become a member of the Livery Company allied to their chosen profession at a much earlier stage of their working life than would normally be the case.

LORINERS

The Company's charitable trust pays for the Lorinery section of the Saddlery Court at Capel Manor College. An annual bursary and prizes are awarded to Capel Manor students and a maths prize is given to City of London Freeman's School.

MAKERS OF PLAYING CARDS

The Company's charitable trust, the Makers of Playing Cards Charity,

Managing risk – career lessons from the Insurers

was founded in 1942 to help those in the playing card industry and their dependants. Since 1977 it has also been free to raise funds for purposes which support young people who are in need and are pursuing education, public service or training.

The Charity maintains its historic links with City schools through Art & Design Prizes given at King Edward's School Witley, City of London Girls School and at City of London Freemen's School.

Otherwise the trustees make grants to up to fifty small charities each year. Recent beneficiaries have included many which provide after-school and out-of-school activities for disadvantaged children and young adults. It is the policy of the Trustees to give preference to projects which match the aims of Sheriffs and Recorders Fund in youth-crime prevention and supporting young offenders into employment. Applications are welcome from registered charities and details of eligibility and how to apply are kept up-to-date on the Website of The Worshipful Company of Makers of Playing Cards.

Amongst regular beneficiaries is the development charity of the English Bridge Union, to support the take up of Mini-Bridge in schools. The trustees welcome informal expressions of interest in Mini-Bridge from schools at any time.

MANAGEMENT CONSULTANTS

Our theme is "bringing out the best of management consulting skills in the younger generations" delivered through our Education and Schools Panel. Our key areas are: creating a pipeline of young people with 'management consultancy key skills' for the future – engaging current members to grow future members over a 30 year period; supporting schoolchildren and students to think like management consultants, through events, programmes and our wider work; providing members with direct hands on experience of education and schools and an opportunity to contribute; providing a link to supplementary schools and school partnerships; creating a focus around 'projects with purpose' taking a holistic view of education and its impact on children and young people. We look forward to collaborating with other Livery Companies and Livery Schools Link to make a difference in education.

MARKETORS

The Marketors Company, through its Charitable Trust, provides a range of educational grants and awards with targeted support for its aim of promoting excellence in the teaching, study and practice of Marketing. Grants, scholarships and awards are offered to a wide range of the academic spectrum from Secondary School to Post Graduate and Executive Education. Specifically in Higher Education, a number of competitive awards are made annually for best dissertation/project write-up on a Marketing topic to Masters students at various UK University Business Schools; an annual fees scholarship is awarded to a worthy student on the International Marketing Programme at Cass Business School (City University); and there is a full fees Bursary available every five years for a Liveryman of the Company to attend the Advanced Management Programme at the prestigious Harvard

Business School.

At Secondary School level, the Company sponsors a sixth form "Entrepreneurial Challenge" at the City of London School for Boys and supports a number of initiatives at St Dunstan's College, Catford.

Strong linkage to the Marketing profession is secured through relationships with the Chartered Institute of Marketing, The Marketing Society and the Marketing Academy with the Company awarding an annual prize to the nominated "Top Teacher" in Marketing.

MASONS

The Company, through its Charitable Trust, is involved in providing a series of schools outreach days where children of 12 and 13 get the opportunity to experience the craft of stonemasonry. Educational prizes are awarded at King Edward's School Witley and City of London Freemen's School. The charitable trust also supports the Cathedral Workshop Fellowship which administers the training of cathedral apprentices at higher levels leading to a degree at Gloucester University. The Company, through its Craft Fund, provides funds to assist people of all ages to train in the craft of stonemasonry. Grants are made at the Building Crafts College and the City & Guilds of London Art School in London as well as Bath, Moulton, Weymouth and York Colleges. A bursary for the training of a stonemason in advanced stonemasonry is awarded at City & Guilds of London Art School. Prizes in the form of tools vouchers are awarded at each establishment.

The craft fund also directly sponsors apprentices at various cathedrals in England, recent apprenticeships being at Canterbury, Salisbury and Winchester, and other cathedrals as opportunities arise.

MASTER MARINERS

The Company in conjunction with the Wellington Trust and the Sir John Cass Foundation operate a school learning programme on maritime history for both primary and secondary schools. There are also sessions for primary schools looking at current maritime trade and business. Recently developed STEM sessions for 6th form students in Physics and Maths explore the maritime environment applying A Level learning to real-world situations. All programmes are run on board the floating Livery Hall HQS Wellington.

Prizes are awarded annually at the London Nautical School, George Green's School and the City of London Freemen's School. The Company sponsors and provides lecturers for an MSc Course in Maritime Operations and Management at City University. There is a perpetual presentation at Christ's Hospital.

MERCERS

The Mercers' Company has a rich history dating back over 700 years with philanthropy as the common thread between our past, present and future. Education has been a core element of this philanthropic effort since the 15th Century and today is a key component of our philanthropy strategy. Our Young People & Education programme supports families and young children in their early years, helps children and young people

achieve their potential through schools and communities, as well as helping young people through challenging transitions into adulthood. The Company's involvement in education encompasses support for a diverse group of 16 'associated schools and colleges' which includes some of the country's leading independent and maintained educational institutions. These include St Paul's School, St Pauls' Girls' School, Abingdon School, the College of Richard Collyer, Dauntsey's School and Peter Symonds College, where Mercers were involved in the founding of the school or college. More recently the Company was the founding sponsor of Thomas Telford School and Sandwell, Walsall and Hammersmith Academies, and also supports Madeley Academy as part of a cluster of schools in the West Midlands. In addition to Hammersmith Academy, other London schools that have joined the Mercers' association of schools and colleges, are Bute House, the Hall School, Holy Trinity and St Silas and Culloden Primary Schools and the Royal Ballet School.

The Mercers current support for these schools and colleges is largely through the provision of grants and governors, and facilitating networking and the sharing of best practice between them. The Company has since commissioned an independent evaluation of mental health and wellbeing work taking place across its associated schools and colleges. The Company appoints or nominates over 70 school or college governors, with the majority of these positions filled from the Company's membership. An annual conference is organised as part of a package of support provided for the Company's governors.

The Company also jointly sponsors Gresham College with the City of London Corporation, and has recently been a founding supporter of the new Chartered College of Teaching.

MERCHANT TAYLORS

The Merchant Taylors' Company has been involved with education for many years. Ever since the founding of Macclesfield Grammar School (now the King's School Macclesfield) by its Master in 1502, the Company's members have established schools in towns and villages across the UK. The Company now has associations with some fourteen schools, state and private, primary and secondary, which educate over 9,000 children, as well as with a number of higher education institutions and schools of arts, drama, music and needlework.

The Company's support includes the provision and training of governors and trustees; bursaries and prizes for students; and a range of events at the Merchant Taylors' Hall - including an education seminar, an inter-school quiz, concerts and formal dinners – for students, teaching staff, headteachers and others. Support in the form of bursaries and awards is also given to students at, among others, the Royal School of Needlework, the Slade School of Fine Art and the Guildhall School of Music and Drama.

The Company also provides grants to staff in its associated schools to undertake research projects, the findings of which are disseminated widely, and supports the professional development of teachers both within its schools and beyond.

Company members are participants in the Livery Schools Link Volunteering Platform and at careers and mentoring events for students organised by the City of London and others.

MUSICIANS

The Company supports the music profession in all its forms by awarding prizes, bursaries and scholarships to talented young musicians. Launched in 2000, our Yeomen Young Artists' Programme is an artists' scheme for world-class young musicians who have won one of our Musicians' Company awards. During the vital first few years of their professional careers we offer them performance opportunities at top venues, and support them to share their skills and passion with the wider community through participation work. Last year the Company took Yeomen into over 50 London schools, all of which had pupil premium and free school meal percentages well above average and little in-house music provision. We also have long-term relationships with schools focussing on students with Special Educational Needs and Disabilities, developing projects with Yeomen using music as a therapeutic and educational tool.

NEEDLEMAKERS

The Needlemakers' Charitable Fund provides support to Old Palace School, St Paul's Cathedral Choir School, the Guildhall School of Music and Drama, City and Guilds Institute, Christ's Hospital School, City of London Freemen's School, City of London School and City of London School for Girls, Treloars School and King Edward's School, Witley. Support for some is in the form of prizes only.

PAINTER-STAINERS

The Painter-Stainers' Company fulfils its objects in support of the education of fine and decorative artists in three ways. It awards school prizes to budding artists in 24 schools around the country and it also

Pattern Makers where making shoes start

awards “Painters’ Scholarships” of £5,000 per annum to 2nd year undergraduates at the Slade School of Fine Art, the City & Guilds of London Art School, Chelsea College of Arts and Wimbledon College to support the completion of their degree courses and a one year decorative surface fellowship for graduates in fine art. Lastly it is the co-founder with the Lynn Foundation of the Lynn Painter-Stainers’ open Art Prize, which was established in 2005 to encourage representational painting in Britain and provide young artists in particular the opportunity to have their work selected and hung alongside more established artists in an annual exhibition in a central London gallery. Full details of this open competition, which annually makes 5 awards totalling £35,000, and those pictures shortlisted for the exhibition over the last fourteen years, can be found at www.lynnpainterstainersprize.org.uk

PARISH CLERKS

The Company gives an annual RE prize to the City of London School and the City of London School for Girls. We give an annual music bursary to a St Paul’s chorister to help with their learning of an instrument and we also give annual donations to the choirs of St Paul’s and Southwark Cathedrals. Through our charity fund we try to support at least one educational charity each year. We have recently created an affiliation with an Air Cadet Force and are hoping that members of the Company will be able to help with various activities. A number of our liverymen are school governors.

PATTENMAKERS

Through its Charitable Foundation, the Pattenmakers’ Company supports two primary areas – the Footwear Industry and Education. For the Footwear sector, we have a programme of supplying craft made bespoke orthopaedic shoes, mainly for injured servicemen attending the Defence Rehabilitation Centre at Stanford Hall. We have recently extended our involvement in this area by launching an Apprenticeship Scheme for orthopaedic footwear. We also provide financial support to students at De Montfort and Northampton Universities and have run

for many years a very popular Young Managers Scheme in both the Footwear and Facilities Management industries, within which recipients receive expert mentoring and work experience training.

In the Education space, we support the two City of London Schools with bursaries, as well as the Guildhall School of Music and Drama and St Paul’s Cathedral School. In addition, we are in the process of establishing a programme of targeted support for London based State Schools.

We are members of the Livery Schools Link and participate in careers events at the Guildhall and the London College of Fashion.

PAVIORS

The Paviers’ Company is driven strongly by charitable and educational objectives relevant to the craft of paving. The Company supports City-related charities, military affiliates, industry, education and hard to reach young people. A significant part of the Company’s charitable giving is expended on education and training.

The London Construction Academy provides pre-employment courses with opportunities for apprenticeships and other employment in construction and related industries.

The Academy is now in its fifth year and is funded almost entirely by the Paviers. It provides work-experience, training and apprenticeships for the hard-to-reach in London’s Boroughs who are not in employment, education or training (NEETS).

Four courses are run each year. Candidates benefit from training in health and safety, first aid, customer service, construction sustainability, manual handling, banksman and employability. In addition, candidates are funded to obtain their CSCS (Construction Skills Certification Scheme) card. After successful completion of the course, candidates are awarded the London Bronze Pass and the opportunity to attend interviews to secure an apprenticeship/employment. Once employment is found, the Academy helps employees work towards obtaining further qualifications, such as NVQs.

By the start of 2019, since the Academy started in 2014, 284 students had enrolled in our courses. Of those, 198 had achieved the London Bronze Pass and 144 had found employment.

The Paviers have been closely connected with the Construction Youth Trust for many years to inspire students to take up careers in civil and structural engineering. The Schools Partnership scheme is now being introduced with the Paviers as a partner. The Trust aims to help build a cross-industry partnership that promotes modern sector careers in long term coordinated relationships with over 100 schools and colleges, targeting those from disadvantaged backgrounds whilst prioritising skilled jobs. The Paviers provide support through role models, site and workplace visits as well as work placements all leading to progression into further education, apprenticeships and/or training opportunities.

Through the Arkwright Scholarships Trust the Paviers sponsor STEM students (science, technology, engineering and mathematics) during their ‘A’ level studies who have aspirations for careers in civil engineering and technical design. Support provided includes mentoring

and work placements. Other scholarships, bursaries and prizes are awarded through the Laing Travel Award at Imperial College, the Institute of Asphalt Technology, the Guildhall School of Music and Drama and for research at Birmingham University.

The Company sponsors the annual Paviers’ Lecture at Imperial College presented by a leading industry figure. We support Coram Life Education which provides health, wellbeing and anti-drugs advice to underprivileged young children through visits to schools. Through the City & Guilds Institute we sponsor Medals for Excellence in highways maintenance and for those who have achieved skills distinction through a vocational route the Paviers award a Craftsman Certificate to Apprentice, Journeyman and Master Pavior.

The Paviers have established an Alumni group with the purpose of providing ongoing support and advice as well as networking in a social atmosphere for the students that the Company sponsor through their educational programmes.

In 1995, the Company established the Road-Makers Museum at the Amberley Industrial Museum near Arundel, West Sussex to exhibit the development of roads and their construction.

PEWTERERS

The Pewterers have provided bursaries at Dulwich College since 1922 and at the City of London School and City of London School for Girls since 1974. The Company also supports St Jude and St Paul’s primary school in Dalston. In 1974, to commemorate the 500th anniversary of its first Charter, the Company set up the 500th Trust to establish a research fellowship at the Institute of Neurology. The Pewterers’ Fellow is an outstanding graduate chosen in a competitive process by the Faculty at the Institute and holds the post for 3-5 years. Successive fellows have undertaken ground-breaking work on Alzheimer’s, Parkinson’s and epilepsy which has attracted international attention. A new Pewterers’ Research Fellow, Dr Robert Wykes, has just been appointed. His predecessor, Dr Ivan Pavlov, co-authored a number of papers and carried out important work on the use of potassium in the treatment of focal epilepsy.

PLASTERERS

We like to make grants of about £5,000. Application is by protocol, briefly stating the background to the application, the Aims or Goals, the Methods to be used and the Measures which will test the efficacy of those methods to achieve the goals. A simple audit on outcome each year releases or increases the grant.

As a Livery we like to be involved with our charity recipients and to work with them at a number of levels. For example, our recent music grants have been for outreach work to schools in more deprived areas of London which would otherwise have little or no music teaching. Firstly, we want each child to have a unique and exciting educational experience whilst, secondly, helping the teachers, all professional musicians, further their careers. Thirdly, we work to make the children aware of our Livery and the City by inviting them for an educational

visit to the Hall and our garden with its Roman wall. We encourage the children to sing to the Livery at our Hall. We are working particularly with Newham and Tower Hamlets through a programme run by the VCM Foundation, and with St Paul’s Whitechapel, Church of England School through the work of Tom Daggett, the leader of the music outreach work at St Paul’s Cathedral.

We are also working with Tom in respect of the Inspiring Organists Programme of the RCO, supporting the tuition of students at both Urswick School, Hackney and Mossbourne Academy, Hackney.

We support a chorister at St Paul’s Cathedral studying at the Cathedral School and Peterborough Cathedral studying at the King’s School. We provide two annual prizes at the City of London Freeman’s School. We have instituted a Junior Technology Prize at Warlingham Park School in Surrey which has an historic association with a former Lord Mayor of the City and Past Master of the Company, Thomas Kelly.

We support various training prizes for the Royal Marines and have recently assisted in the introduction of a specialist language bursary to the Royal Marines Reserve. We make mutual visits to an Air Cadet Squadron in East Ham. We have purchased musical instruments and regalia for the Band and provided the cadets with music education classes and career mentoring.

Our annual Training Awards supported by the Plaisterers’ Charity and sponsored by British Gypsum, with additional support from Hadley Industries and St Gobain Formula, recognise and reward achievement and excellence in training in the trades of Plastering and Drylining. Awards are made to Colleges and training providers throughout the UK. By supporting the quality of delivery we ensure that the Plastering Departments of FE Colleges maintain a high profile so as to sustain delivery. We award Student and Apprentice of the Year Awards and invite the winners of the National Skillbuild Competition to attend so maintaining the emphasis of our Awards on the achievements of students.

In 2018 we embarked on a three year programme with the Prince’s Foundation supporting heritage plastering.

Our current Trade Bursary scheme provides individual awards to students of all ages. The amount is usually circa £500, mostly for costs incurred in training that other sources of funding cannot meet, such as travel.

PLUMBERS

The Company provides a range of grants to plumbing and water-related charities and organisations.

An annual book prize is awarded at City University London. Bursaries are given for plumbing apprentices across the UK and prizes are awarded for the best plumbing students in London colleges and in the North East.

The bursary scheme for plumbing training is well established, supporting six students each year, and integration of plumbing and heating engineering training into a comprehensive public health engineering training programme. Masters’ awards are made annually.

Building for the future – Paviers and the Construction Youth Trust

POULTERS

The Poulters sponsor students in the poultry industry, mainly through Harper Adams University. They sponsor each student for three years, but only those students on a course with a poultry interest. However we consider individual educational and research projects relating to the poultry, egg and game industries. Applications for support are welcome and should be addressed to The Clerk, Julie Pearce, poultersclerk@live.co.uk. We also give a bursary annually to students from the City of London School for Girls for music lessons.

PUBLIC RELATIONS PRACTITIONERS

The Company work closely with our professional industry bodies – the Chartered Institute of Public Relations and the Public Relations Consultants Association - to ensure that the industry at large achieves a coherent approach to education and training, and that this work translates into tangible action. The PRCA is the lead for the national Public Relations Apprenticeship programme

As a Guild we established strong bonds with Livery Schools Link since its inception and actively supported its development through to today. Our Company has worked with LSL to use the Digital Volunteering Platform to extend our volunteering and charitable endeavour.

We present two annual prizes – the Herald’s award, which is awarded to PR practitioners for outstanding charitable endeavour; and the Clarity in Communications prize (in association with the WC Glaziers), which is awarded to a non-professional PR practitioner in the liver for excellence in communications.

The Company provides pro bono media relations support for the WC Woolmen’s annual Sheep Drive over London Bridge. Our members also provide pro bono volunteering support to City Action and ELBA.

SADDLERS

Over 800 years since its emergence as a Guild, the Saddlers’ Company is fortunate still to have an active trade in the 21st century with which it is closely engaged – not least in promoting saddlery apprenticeships, training and education. Much of this support is directed to Capel Manor College and the Company’s own Millennium Apprenticeship Scheme, but a substantial amount of funding is also channelled to individuals through the Saddlers’ Company/City & Guild Bursary Fund.

With regard to schools and colleges, the Company provides funding in the form of annual grants from charitable and corporate funds for purposes proposed by the relevant school or educational institution and approved by the Trustees. Regular beneficiaries include the City of London Academy Islington; City, University of London; the Royal Veterinary College; Alleyn’s School and Beormund Primary School among others.

Some of the money that is provided by the Company is directed towards educational support programmes, scholarships and capital projects; other monies are earmarked specifically for direct support to students in the form of prizes, bursaries or awards. Bursaries may be awarded to specific students or allocated for the benefit of a

class of students. The Company supports the principle of staff awards to recognise excellence, achievement or dedication and is content to leave such awards to the discretion of the educational establishment concerned particularly where there are programmes in place designed to provide opportunities for students who might otherwise not be able to attend those institutions.

In particular the Company is concerned to ensure its support reaches those who are in financial need and who might otherwise not be able to fulfil their true potential but for such support. The Company is keen to support educational programmes, courses or specialist interventions which target young people at risk of exclusion, who are underachieving or at risk of leaving school without basic literacy or numeracy skills. The Company provides governors and representatives to sit on school boards (COLAI & Alleyn’s), councils (City & Guilds) and advisory boards (Capel Manor College). The Company supports schools which seek to disseminate and share best practice with schools in the state sector (e.g. Alleyn’s).

SALTERS

The Salters’ Institute, the flagship charity of the Salters’ Company, primarily focuses on Science, and particularly Chemistry, at secondary level. The Institute is considered to be at the forefront of curriculum development through its work with the University of York Science Education Group. It also works closely with the Royal Society of Chemistry and other organisations to promote science education and have input into current policy.

The Institute annually runs about fifty one-day Festivals of Chemistry at forty universities and colleges in the UK and the Republic of Ireland for students in KS3 (or equivalent). These events are funded by the Institute and other partner organisations. Teachers attending Festivals of Chemistry with their students are offered parallel CPD sessions.

Following on from the successful Chemistry Camps for 15 year olds in the UK which the Institute ran for 18 years until 2015, the Institute is now running a residential Chemistry Camp programme across India in partnership with the Royal Society of Chemistry. The students at these Camps come from disadvantaged backgrounds and it is their first opportunity to do practical Chemistry.

The Salters’ Institute awards prizes annually to the top three to five students taking the Salters’ Advanced exams at A2, in Biology, Chemistry and Physics. The Institute gives annual awards to Science Technicians in schools.

The Salters’ Institute is working with Gatsby and other organisations to develop programmes for apprentices and technicians working in Chemistry-related industry.

The Salters’ Charitable Foundation, the Company’s grant-making organisation, provides support to a range of educational organisations, including long-term core funding and specific educational project grants. Working in partnership with other educational establishments, the Salters’ Charitable Foundation funds a number of scholarships and prizes for outstanding achievements. These include an annual Salters

Arkwright Scholarship, bursaries for students experiencing financial hardship at City & Guilds and sponsorship of an exceptional student at the Guildhall School of Music & Drama. The Company also has four Salters’ Governors, who provide support and guidance to Presentees at Christ’s Hospital.

The Heritage Lottery Funded project to open up the Company’s unique archive collection and history through a new education programme has now been completed with over 4000 people visiting the Hall as part of the project. The Company is continuing this programme, offering free onsite school workshops for KS1-5 as well educational events for families and adults.

The Company was awarded a Heritage Lottery Fund grant for the Salters’ History and Heritage project which will open up the Company’s unique archive collection through a brand new outreach programme for schools.

SCIENTIFIC INSTRUMENT MAKERS

Through its Charitable Trust the Scientific Instrument Makers support education initiatives from Key Stage 2 (primary school children) through to post-doctoral university-based research. A planned growth strategy over the coming years is likely to see increased levels of support prevail, which will be targeted at STEM disciplines so as to protect the future delivery of science and engineering graduates into an expanding knowledge-based economy.

The Company currently supports the Charles Dickens Primary School and the London Nautical School through annual grants to buy equipment to enhance the education of science in addition to providing funding for visits that enrich the curriculum. We also support the City of London Academy Southwark through the provision of two prizes that reward individual science-based performance. The Company supports four annual Arkwright Scholarships for pupils in Key Stage 5 (Sixth form) and guides them through their post-18 options via appropriate career guidance. Each Arkwright Scholar is encouraged to become apprenticed to a Liveryman and are assisted financially whilst they are at university or in a work-based apprenticeship. The Company assists in the identification of ‘Young Engineer of the Year’ and provides funding to allow the winner to compete in the USA at an international young engineers’ event. Each winner and those that are highly commended are invited to become Livery apprentices.

We currently offer individual post-graduate (taught) grants to students at seven universities that supports full-time enrolment over a one year period; and award an annual post-doctoral Beloe Fellowship annually that provides support for a period of three years.

Outside the curriculum we hold an annual ‘STEM day’ for Key Stage 3 pupils in order to try and influence choice of science-based GCSE subjects – this alternates between a girls-only event to acknowledge the ‘Women in Science/Engineering’ drive, and an event for boys and girls. We support the local Southwark Sea Cadets, T/S Cossack, and its umbrella body in the Southern region. Finally, we are supporting the training of primary school teachers at five schools through our

relationship with the ‘Primary Engineering’ organisation.

SCRIVENERS

The Scriveners Company supports education through the provision of bursaries and/or other financial support from its Sexcentenary Charity Fund to the City of London School for Girls, St Paul’s Cathedral School, the City of London School, the City of London Freeman’s School and the Sir John Cass Red Coat Foundation School. The Company also provides occasional further financial support to schools via the Master’s discretionary fund and another Charitable Trust, set up by a former member of the Company. An annual handwriting competition for schoolchildren, the Karen Nehammer Prize for Years 6, 7, 8 and 9, is a reflection of the Company’s long-standing association with calligraphy and document production generally, as is the prize for calligraphy and illumination, the Peter Esslemont Prize. The Company also sponsors a Keenest Reader Award at the City of London Academy, Southwark. Members of the Company also visit schools to assist with handwriting projects.

SECURITY PROFESSIONALS

We have developed a strong relationship with the Harris Garrard Academy, Bexley (“HGAB”) – formerly known as the Bexley Business Academy - and with Reed’s School, Cobham, Surrey (via the Reed’s School Foundation). The direct support for HGAB extends to funding and running the Whittington Course annually, providing the Annual Endeavour Award and assisting with Cadet Unit funding. Our support to the Reed’s Foundation has been through assisting with the Founder funding, albeit this is now taken on a year-by-year basis.

The Whittington Course will be in its eighteenth year in 2019. Originally conceived by Alderman Sir David Brewer CMG CVO JP, our sponsoring Alderman, the course is a day-long series of visits in and around the City of London – its principal aim is to demonstrate to young students that they can achieve great things through study and application. They usually visit Barclays and Canary Wharf Management, Guildhall and the City of London Police. At each stage they get to meet and talk with graduates, managers and officers (junior and senior – the Commissioner often turns up, much to their delight), to learn more about the world of work. On the occasion of the tenth anniversary of the Whittington Course, the students were invited by the then Lord Mayor, David Wootton, to tea at the Mansion House, where one of the speakers was a former Whittington Course girl training as a solicitor in a City practice. We launched our Apprentice Scheme in 2012 and last year accepted two students from each school (as well as some Cadet and other areas of the Security Profession). The Apprentices, as well as attending Livery events, are encouraged to support their schools and the students, particularly with the link to the City and the Company. With our new annual intake, the number of WCoSP Apprentices now stands at thirty-two.

The Endeavour Award is a financial award to assist with the costs of university education. With HGAB we select annually two or three

students who, for each year of their three-year courses, receive the award. Its purpose is not necessarily to recognise the brightest students, but those who through their fortitude and determination have shown the greatest endeavour to achieve success and attend university. It is incumbent on the recipients to report progress to HGAB and, where possible, assist them through speaking with and supporting current students. We initiated the Award to recognise the enormous progress the Academy staff had made in getting youngsters into tertiary education. Our prize for 'All-round Contribution – Senior School' is presented annually at the City of London Freeman's School.

Our Apprenticeship Scheme is open, as above, to students from HGAB and Reed's as well as from police and military cadet units, undergraduates and others who have the appropriate interest.

We also provide a prize to students at King's College London for the best essay on the MA War Studies Masters Course, specifically in the module on Terrorism, Security and Society. It must demonstrate practical value to society as a whole.

Support for education is a theme of the Company; however, we do also focus upon and encourage good citizenship and work to keep vulnerable people - particularly youth - away from crime. In the past we have supported athletics coaching programmes in this area.

We are currently supporting Blind in Business, which brings visually impaired youths into the City to experience the world of work.

SHIPWRIGHTS

The Shipwrights' Company' support to education includes direct support to individuals, educational establishments and projects from secondary school on enabling it to continue its long tradition of promoting and supporting education in the City and nationally. The Company's involvement in education includes financial and mentoring support to university students, funding and advice for small businesses employing and training apprentices and vocational training. The Company continues to support Livery Schools Link and participated in the Careers' Showcase event at Guildhall but it also sponsors the Volunteering Platform initiative which has such great potential.

The Shipwrights' Company provides an annual grant and link Governors to two London schools; the London Nautical School in Lambeth and George Green's School on the Isle of Dogs. In conjunction with other Livery Companies, the Company funded the purchase of much needed science equipment for the London Nautical School and repeated the success of the previous year by funding a weekend youth engagement project on the Isle of Wight run by UKSA for twenty pupils from George Green's School on the Isle of Dogs. The Company sponsors an annual art competition for both schools and this year the opportunity was also opened to La Retraite School in Lambeth.

This year a total of twelve three-year bursaries were awarded to students reading undergraduate or post-graduate degrees in ocean and marine engineering, naval architecture or ship science at Newcastle University and the Universities of Southampton and Strathclyde. Three bursaries are awarded to promising students from each of the three universities

selected after their first-year exams, whilst the Denholm Bursary at the University of Strathclyde provides funding to a further three selected students who would otherwise be unable to afford their studies. The Shipwrights' University Prizes 2018, were awarded to the student from each university who achieved the highest marks in their penultimate year's exams, and the winners were presented with their prizes and certificates by the Prime Warden at a Court Meeting in March. They were:

Ms Alexandra Willis - Newcastle University

Mr Ben Pickering – The University of Southampton

Mr Bruce Cavanagh - The University of Strathclyde

The Company has continued its programme of providing dedicated Liverymen as mentors to assist their affiliated university with the selection of students for bursaries and provide a close link between the students, the Company and the industry.

The 2018 Fieldhouse Memorial Prize was awarded to Sub-Lieutenant Samuel Wilson RN, who achieved the highest grade and was the top student on the Royal Navy's Nuclear Reactor Course at HMS SULTAN, Gosport, enabling the Shipwrights' to continue their close relationship with education in the Armed Forces.

Since 2000 some 300 apprentices have entered the Queen's Silver Medal Competition. In 2018 eighteen apprentices from across the industry and the country were selected to participate in the central part of the competition, a week-long residential course on Kielder Water in Northumberland where they undertook a range of physical and mental challenges and were tested to the full. The final stage was an interview panel in London at which the six apprentices graded top of the course competed for the final prizes. This year saw the introduction of a new prize for the apprentice who displayed the most notable endeavour during the competition. The prizes, which were presented by the Prime Warden at a Court Meeting, were awarded to:

The Queen's Silver Medal– Mr Andrew Finlayson of BAE Systems Naval Ships.

The Shipwrights' Bronze Medal – Mr Lee Steen of BAE Systems Glasgow.

The Derek Kimber Medal – Mr Oliver Smart of Sunseeker International Limited.

Prize for Most Notable Endeavour at Kielder – Mr Aaron Abad of Gibdock.

BAE Systems Submarines in Cumbria was awarded the Company prize for providing the highest degree of training and support to its Apprentices during the various stages of the Queen's Silver Medal Competition in 2018.

The Company's Billmeir Award Scheme provides grants to assist apprentices and students studying at marine and boat-building schools and colleges with their tuition fees and the purchase of tools. In 2018-19 a total of twenty-two recipients from a range of colleges across the United Kingdom, and one studying in Norway, were awarded grants. The Company also continued its sponsorship of the Shipwrights' Prize at the Institute of Chartered Shipbrokers.

The Shipwrights Apprenticeship Scheme has awarded a total of 26 grants to 22 small businesses for Academic Year (AY) 2019-20. The Scheme, which has been running since 2014, aims to encourage and assist small businesses in the marine and maritime sector to employ and train apprentices by removing some of the element of risk faced by employers by underwriting the first year's wages in the form of grants or loans. The Scheme, which receives a significant proportion of its funding from Lloyds Register Foundation, also provides employers with advice on, and assistance with, the identification and selection of applicable training, education and development opportunities. The Company has developed an ambitious business plan to capitalise on the success of the current Academic Year and increase the number of funded apprenticeships.

For more information on our educational initiatives please visit www.shipwrights.co.uk/education and feel free to follow us on Twitter @shipapprentices

SKINNERS

Through our Education Office (two members of staff) we provide a range of strategic and clerking support services to the seven schools and academies within the Skinners' family: Tonbridge School (Tonbridge); The Skinners' School (Tunbridge Wells); The Judd School (Tonbridge); the Skinners' Academy (Hackney); the Skinners' Kent Academy (Tunbridge Wells); the Skinners' Kent Primary School (Tunbridge Wells); and The Marsh Academy (Romney Marsh). Many students are invited to visit Skinners' Hall, and our schools and academies make annual recommendations for students to join the Company as Apprentices.

Our key focus is to provide strong governance with an emphasis on school improvement. We support our governing bodies by providing strategic advice, training and administrative support, and by encouraging members of the livery to offer their time and talents as governors. We aim to connect our "family" of schools with a wide range of services, including joint procurement advice, training and collaborative activities such as the Middle Leadership Development Programme.

The Company administers Foundation funds on behalf of the schools and uses these to support students in a variety of ways, including subsidising prize-giving events and leavers' exhibition awards. Through our Charities Office we provide hardship funds for our schools and support young people to access tertiary training on a national basis.

SOLICITORS

Through the City Solicitors' Educational Trust the Company supports the City Solicitors Horizons scheme. It is a pilot social mobility initiative aimed at improving access to the legal profession for young people from disadvantaged backgrounds. It is being run through the Trust and is sponsored by the Company, The Legal Education Foundation and 18 major City law firms. Starting in 2016, over a 3 year period, 50 students annually from Universities in London and the South East of England are being selected to take part in a 3 year programme which will run

alongside their degrees. Each intake will benefit from comprehensive classroom and one-to-one training sessions, mentoring from lawyers and work experience with the sponsoring City law firms.

SPECTACLE MAKERS

The Spectacle Makers' Company established its position as a qualifying body for opticians at the end of the 19th Century. In the late 1970s and early 1980s, to promote specialist training for ophthalmic and dispensing professionals, the Company played a prominent role in the establishment of the College of Optometrists and then the Association of British Dispensing Opticians and then turned its attention to increasing skills and knowledge among professional support staff. Its aim was to provide an accessible career pathway in which individuals of all ages, backgrounds and previous educational achievement levels could develop and progress within the optical sector.

WCSM is currently an approved Awarding Organisation offering examinations and workplace assessment qualifications for optical professionals at Levels 2, 3 and 4, and its qualifications are similarly recognised by the SQA at levels 5 and 7 in Scotland. With the growth of apprenticeships and a move towards greater online learning with continuous assessments rather than final examinations, the Company has recognised the need for change and announced in March 2019 that it would withdraw from accredited qualifications by 31 March 2021. Existing candidates and trainees will be supported through the transition period and are being encouraged to complete their qualifications.

The Company has supported the principle of apprenticeship throughout its history and has encouraged employer groups to set standards for two Government approved Trailblazer Apprenticeships in England for Optical Assistants and Spectacle Manufacturing. A further employer-led apprenticeship in Scotland is expected to launch in 2019. The Company hopes that this will lead successful apprentices on to further learning and qualifications available within the optical sector.

WCSM still plays a prominent role in optical research, which the Company seeks to encourage through the award of bronze, silver and gold medals. The bronze Ruskell Medal and Master's Medal are awarded annually by competition to encourage those making a first author contribution to the advancement of visual science, including research on new products and applications to help vision impaired people. The silver and gold awards recognise outstanding post-doctorate research.

In 2016, the WCSM Education Trust instituted a new bursary scheme for those undertaking training courses in the United Kingdom leading directly to employment in optical professions, ranging from day release courses for assistants right through to degree programmes in Optometry and Orthoptics. The scheme has been very successful, with over £65,000 awarded across a range of disciplines. The first bursary winners will graduate in summer 2019. The Education Trust has also instituted a travel award scheme for ophthalmologists in training whose papers have been selected for presentation at national and international conferences. This programme is now in its second year.

As part of its charitable work, the Company has for several years funded

BTEC and first aid training courses for its affiliated ATC squadron and supported the work of the Vision Impairment Adviser at Treloar's School and College. The Company is a keen supporter of the annual Livery Companies' Careers Showcase. It has used this event as an opportunity to introduce secondary-school pupils to the range of optical professions which exist, to develop their thinking about eye health and to highlight some of the traditional skills and wide variety of materials used in bespoke spectacle making, which is currently undergoing a renaissance in London.

STATIONERS

The Stationers' Company, through its education charity, the Stationers' Foundation, aims to create links between students at all educational levels and the communication and content industries.

At primary school level, the Company supports literacy by sponsoring two Saturday Schools in London, managed by Civitas Schools.

At secondary school level, the Company sponsors Stationers' Crown Woods Academy in Greenwich, which is part of Leigh Academies Trust, the Company's chosen educational partner. The Stationers' Academy specialises in digital media and the Company has invested a significant sum in a state-of-the-art Digital Media Centre, which is the focus of the delivery of a new digital media curriculum to all year groups. The Company provides the Chairman and three other Governors, around 30 mentors and a number of speakers at careers events. Together with Greenwich Hospital, the Company has funded the formation of a new Royal Marines CCF unit at the academy. The Company also sponsors the annual SHINE School Media Awards, in which secondary school students from across the country win awards for their school magazines, podcasts and websites.

At apprenticeship level, the Company is the inaugural sponsor of the Queen's Bindery Apprenticeship Scheme and a sponsor of the Evening Standard Media Diversity Apprenticeship Scheme. In 2018 the Company will run an event with Ravensbourne to promote apprenticeship opportunities within communication and content businesses close to London.

At higher education level, the Company supports a number of undergraduate and postgraduate bursaries for students at selected HE institutions, who are on courses that lead to careers in the communication and content industries or are undertaking research in copyright and intellectual property law.

Lastly, the Company supports Bound by Veterans, a charity that uses the restorative powers of manual bookbinding to assist rehabilitation, improve health and well-being and to develop employment skills for injured ex-servicemen and women.

TALLOW CHANDLERS

The principal objective of the Company is to provide relevant, focused support and giving to young disadvantaged people, and to promote educational excellence. This support is primarily focused on education, training and employment.

We have three 'flagship' beneficiaries that receive some of our largest three-year donations, and programmes of non-financial support. These are Greig City Academy in Haringey, the Halley Academy in Greenwich and Cubitt Town Junior School in the Isle of Dogs. We have facilitated links between our flagship schools and other establishments and charities that we support. Members of the Company, past Tallow Chandlers award winners and trade associates regularly take part in voluntary activities such as mentoring, careers events and talks.

We recognise and encourage educational excellence through the award of bursaries, scholarships and prizes to students at our flagship schools, and other establishments including City & Guilds, Barts and the London School of Medicine & Dentistry, as well as trainees and apprentices within our associated industries. We run an annual competition for MBA students at the Cass Business School, where the top three student teams take part in a grand final at the Hall giving presentations on topics relevant to the energy and oils and fats industries.

This year, we will continue to deepen our relationships with our three flagship schools and to support the transition of students to college, university or employment. We celebrate successes with an annual Education Awards Luncheon for students held in April, and an annual Supper for Past Award Winners in September, some of whom go on to become Freemen of the Company.

TAX ADVISERS

The Tax Advisers' Charitable Trust supports educational activities as part of its charitable objectives. Including, Treloars' School and College, The Mansion House Scholarship scheme, St John Ambulance City of Westminster Cadets and the City of London & NE Sector Army Cadet Force with annual donations and prizes. A prize is awarded to the student with the highest mark at King's College for the Tax Law paper in the LLM International Law course.

The Tax Advisers' Benevolent Fund supports students in need studying for professional examinations with the Association of Taxation Technicians (ATT) and the Chartered Institute of Taxation (CIOT). At the ATT level a prize is awarded for the best performance in the Trailblazer Apprenticeship examinations. At the CIOT level, a Tax Advisers' medal is awarded for the Corporate and International Taxation paper in the Advanced Diploma in International Taxation [ADIT]. A bursary is also available to help with the costs of studying for ADIT. Many members of the Company volunteer at their local schools and colleges providing services such as acting as Governors, being involved with careers advice and giving talks about taxation and finance related subjects.

TIN PLATE WORKERS ALIAS WIRE WORKERS

The Company continues to support two partner primary schools, Canon Barnett (Tower Hamlets) and Thomas Fairchild (Hackney), and is currently assisting their participation in the Food Journey Project. 2016-17 saw an excellent outcome from our partnership with Archbishop Tenison's School, Croydon, where students learned about the everyday

use of tin plate as part of the WWI Commemoration Art Project. Regular contributions also support: bursary funds and prizes at the City of London Freeman's School and the Guildhall School of Music and Drama; a City and Guild Medal for Excellence; and the Mansion House Scholarship Scheme. Following a major award to the Amos Bursary in 2010, a number of Liverymen continue to act as mentors to Amos Bursary students, academically able young men of African and Caribbean descent, from London schools and sixth form colleges.

A growing theme in recent years has been design in non-precious metals. At Central St Martins School of Art, prizes for 2nd year BA jewellery students taking a curriculum unit in tinsplate and wire design are followed by a 3rd year award for jewellery design in non-precious metals. At the Royal College of Art, MA Ceramics and Glass students complete a project using tin, wire or tin oxide glazes. At Loughborough University, 2nd year engineering design students undertake a term-long project designing and producing marketable tin plate and wire products, with prizes for the winning teams. Students from colleges throughout the country compete for a prize awarded through the British Art Medal Student Medal Project.

Our Chamberlain Enterprise Research Project is part-funding research undertaken by a PhD student at Brunel University. Meanwhile, young people at a wide range of Universities benefit from the Company's awards and prizes, most of them studying materials engineering or other subjects linked to our trades. At City University travel grants enable young PhD or post-doctoral researchers to present their work at overseas technical conferences. At Swansea University, undergraduates compete for a summer internship at Afon Tinplate, a local manufacturing company, and other work experience opportunities. 'Best in class' undergraduates at Imperial College and Manchester Universities receive book prizes, as part of a joint initiative with Rolls Royce. Book prizes are also awarded at Cardiff University, The Company continues to organise Metals Industry Apprentice of the Year awards for craft skills and career development. Established some 20 years ago, these remain the only awards specifically for apprentices employed in metals manufacturing.

TOBACCO PIPE MAKERS AND TOBACCO BLENDERS

An annual donation is made to fund a music prize at Sevenoaks School and grants are made to support 3 students at Guildhall School of Music and Drama. Support is given to Physics Partners (formerly PhysicsS3 - Success in Shortage Subjects); a charity started in 2008. Physics is the most under-represented of the three sciences at Alevel and 70% of state secondary schools have no qualified physics teacher. Physics Partners works with schools to encourage setting up local partnerships, often between state schools and local independent schools.

TURNERS

In accordance with its charity strategy, the Company awards bursaries, provides development grants, trophies and prizes to promising turners and students and the best trainee tradesmen in the three armed services.

Working with flowers as a career choice

Lathes and related tools and equipment, together with skills training and support, are also provided to educational establishments and to institutions and schools for disabled children and adults. The Company is also supporting Phoenix House Recovery Centre, Catterick, which is run by Help for Heroes and forms part of the Defence Recovery Capability.

In the absence of any national accredited woodturning qualifications, the Company is developing a woodturning qualification scheme in conjunction with the Association of Woodturners of Great Britain (AWGB). The design and implementation of the basic Certificate course is complete and was launched in 2014. This was well received by the craft and work is underway to locate other suitable Certificate training centres throughout the UK. Work on the design of the Diploma course continues. The Company also selects outstanding practitioners of the craft for a lifetime achievement award of 'Master in Turning'. The Company sponsors Youth Turning Training, in partnership with the AWGB, with the aim of introducing young people to the craft of turning. Courses have been held throughout the UK with tutors from the AWGB and the Register of Professional Turners (RPT). A small number of students have gone on to take up turning as a profession.

TYLERS AND BRICKLAYERS

Prizes are awarded to students at City of London School, City of London School for Girls, City of London Freeman's and St Paul's Cathedral School. The Company supports the Mayor's fund for London and sponsors a Presentee at Christ's Hospital. It also gives support for the Guildhall School of Music & Drama. They support awards made by World Skills and Skill Build for roof slating and tiling, bricklaying and thirdly, wall and floor tiling. The Company also sponsor an Annual Bricklaying Award at the Building Crafts College.

UPHOLDERS

The Company supports education and especially training in upholstery and soft furnishings through the Association of Master Upholsterers and Soft Furnishers, [AMUSF] and approved training centres. Currently awards are given at City of London Freeman's School and students on upholstery and furniture restoration courses at The Cass School of Design at London Metropolitan University. The Company is a member of the Livery Companies Apprenticeship Scheme and the aspiration of senior Court members is to continue to support apprenticeships, training and education beyond the scope of LCAS. Members of our Livery give presentations and demonstrations at various events, careers fairs and schools.

VINTNERS

Long standing support is provided to the Stepney Greencoat School which receives an annual grant for the furtherance of arts education, plus additional support when requested as well as a governor provided by the Company. Bursaries are still in place to assist with higher education costs for leavers from the Sir John Cass Redcoat School which will remain in place for a further 2/3 years. Support is also provided to New Regent's College, a pupil referral unit in Hackney which assists pupils to reintegrate into mainstream education. This support has been in the form of prizes and grants for specific projects. Grants and prizes are also awarded to the City of London Academy, the Guildhall School of Music and Drama, and City & Guilds. The Company is open to requests for support from non-affiliated schools and provides a number of bursaries and awards for trade related education, especially with the Wines & Spirits Education Trust, as well as support to Plumpton Agricultural College in Sussex. There are also other bursaries and awards to assist members of the wine trade wishing to take their professional studies further.

WATER CONSERVATORS

The Company and its charity, the Water Conservation Trust, support water and environment education through two major programmes – for universities and schools – and a variety of smaller programmes. The universities programme provides a bursary against fees for students engaging on Masters level courses relevant to the Company's interests. Over the past 11 years, bursaries have been awarded to over 110 students at 18 universities. In addition, we award prizes to the authors of the best dissertation on the course we support and we contribute towards course dissertation costs. Our schools programme reflects the varying needs of schools which contact us. Projects range from the construction or safeguarding of ponds for educational use, STEM based needs – outfitting classrooms, and a special scheme - the Pupils Prizes Scheme - where Company members support and supervise environmental projects in local schools, with the Trust making small financial awards. In the London area, the Company encourages school initiatives related to water efficiency, often in collaboration with Thames Water. We offer long-term support to

Hugh Myddelton Primary School in Islington responding to requests for financial assistance for water and environmental education equipment. The Trust also offers medium term development grants to a number of schools. At Ysgol y Gogarth, in Llandudno, which takes students with a wide spectrum of learning needs, the Company encourages rural studies and supports strategies to teach skills, such as gardening, that are relevant to local employment needs. This has been extended to Ysgol Tir Morfa in Rhyl.

Other applications are taken on their merits. For example, we offer small scale ongoing support to the National Union of Students' Student Eats Programme which encourages an interest in horticulture on university campuses. We make an annual award to Maidstone Sea Cadets to enable their best student to stay on their training ship. We also offer long term support to Treloar College, both in terms of an annual grant and a positive response to water and environmental projects.

WATERMEN AND LIGHTERMEN

The Company supports apprentices and trainees in training over a 5 year apprenticeship because to become a Captain of a boat a person must be aged 21 years or over and 25 for a Large Passenger Vessel. Apprenticeship dates back to the first Act of Parliament in 1555, which dictated that any waterman had to have one year's experience before they could take charge of a boat.

Apprentices come to the Company between the ages of 16-19 years, if older than 19 years they are taken on as a trainee. A third of young people are "trainees" as they may already have work experience elsewhere or are looking for a career change.

The Company accepts students who have GCSE's in Maths, IT and English, but previous experience on the river is not necessary. On average, some 35 apprentices/trainees join the Company per annum. There is a rate of drop out over the apprenticeship period, but sometimes the break is only temporary.

The Company has close links with rowing and skiff clubs who all have educational programmes linked with local schools.

There is a connection with London Nautical School in Lambeth, their sixth form students do maritime studies as a step towards a skipper qualification.

Watermen may apply for support towards fees or grants for equipment for their own children in any independent school, subject to them meeting the Company's charity's hardship criteria.

The Royal Benevolent and Educational Fund supports the Company's apprenticeship scheme and the apprentices/trainees.

The Maritime Skills Alliance was set up to set standards for canals, waterways, deep sea vessels, tugs, Seafish (fishing industry). If apprentices qualify for the Government scheme which funds training, some of them attend college. The Company's Training Officer also carries out training and he himself works as a Captain on the River Thames. Other Thames based Captains help lecture.

Watermen & Lightermen apprentices also take part in the annual Doggett's Coat and Badge Wager, a race that has taken place every

year since 1715. The race is organised by Worshipful Company of Fishmongers.

WAX CHANDLERS

Currently, the Company supports students who require financial assistance to complete their sixth form studies at the City of London School and the City of London School for Girls. In addition, the Company provides financial support to a student at the Guildhall School of Music and Drama, and it also supports the City of London Freeman's School. The Company is a leading member of the Livery Companies Apprenticeship Scheme. In partnership with the Bee Farmers Association, the Company aims to make the UK more self sufficient in producing honey by educating the younger generation in the practices of honeybee husbandry, honey and wax production, and queen bee rearing.

WEAVERS

The Company has a Primary Schools Committee which presently supports the following schools in London: Grange Primary School (Southwark); Chisenhale Primary School (Tower Hamlets); St Andrew's Cof E Primary School (Stockwell). Whilst secondary schools have not been the subject of a dedicated programme, children of this age group are supported indirectly through the wider activities of the Company's Charitable Grants Committee, which has a focus on helping disadvantaged young people.

The Company's Textile Committee supports the UK weaving industry. This includes the provision of specialised support and grants to the following Textile Colleges: Royal College of Art; Loughborough University; University of Huddersfield; University of Derby; Heriot-Watt University; Nottingham-Trent University.

Primary School grants are made to the school itself, not to individuals. However, some grants may enable children from disadvantaged backgrounds to participate in certain extra-curricular activities such as school trips, sporting activities and breakfast or after-school clubs. The provision of classroom IT equipment such as "iPads" has proved popular amongst pupils! Tertiary level support to students includes scholarships to weave students from our supported colleges, the Associate Weave Prize at 'New Designers' and a work placement scheme for graduates. In addition, the Company sponsors an annual scholarship to the Guildhall School of Music and Drama.

The Company aims to build close partnerships with the selected primary schools and to maximise the impact of its contribution by focusing (where possible) on particular projects across our partner schools that align with our wider charitable objective of helping young people at risk. Head teachers tell us that they greatly value the trusted relationships that they have formed with their Livery governors. Thus, for example, we have provided a home-school liaison worker and helped some of the schools to increase their provision of breakfast clubs and after school activities. We have also renewed playground and library facilities and sponsored a "writer in residence" programme. Some liverymen have

volunteered to read with the children or to help run a summer fair for a school. A Weavers' award scheme to promote positive behaviour in each of our partner primary schools.

At tertiary level, building on our weaving heritage, the Company is particularly interested in providing support for the study of woven textiles and assistance for those who intend to work for the benefit of the UK woven textile industry.

Livery Governors are in place at all three supported primary schools (Chair of the Governing Body at one school). The Head teachers of the primary schools are invited to various Company functions, including an annual lunch with the Primary Schools Committee to share experiences and ideas.

The Company sponsors an Entry to Work Scheme to place weave graduates from Textile Colleges into the UK woven textile industry. [Co-sponsored by the Clothworkers Company.]

The Company is linked with the City of London Academy, which has created a "Weavers House" in honour of the Company.

WHEELWRIGHTS

The Company commenced its first affiliation with a school in 2018, introduced to them by the Worshipful Company of Hackney Carriage Drivers, which they are very excited about - Burnt Mill Academy in Harlow. The relationship is still in its early stages with initial plans to provide one or two speakers each term with a career development theme. We already give a prize for a piece of work at the Barts and London School of Medicine and Dentistry usually associated with disability.

Two Wheelwright apprentices recently completed their training under the Livery Company endorsed apprenticeship scheme and the Company has now joined with the Worshipful Company of Coachmakers to share funding the training of a further apprentice.

There is an aspiration in the Company to extend their support for education in schools and since the charitable objective of the Company centres on improving mobility, there would be scope for funding projects which support mobility in its broadest sense.

WOOLMEN

The Worshipful Company of Woolmen's charitable trust regularly gives to organisations connected with the wool industry, the City of London, the Lord Mayor's appeal, HM Armed Forces charities, including the Cadets, and other good causes.

In particular, the Trust supports students studying fashion technology, textile and fashion design management, technical innovation and design, manufacture of wool products, fashion design marketing and promotion, research into wool, and research work into appropriate veterinary procedures. Currently the Trust is supporting five students at Heriot Watt University; five students at Huddersfield College; five students at the Scottish Rural University; two students at Herriot Watt and two students at Harper Adams. We have this year awarded a grant to students at Lincoln University and Northumbria University. We

have also recently supported students at Ruskin Mill, Cockpit Arts and Chelsea College of Art and Design. The Trust combines with the Staple to fund an Innovation Prize for innovation in the production and marketing of wool. The Trust continues to support shearing competitions at the major UK agricultural shows - the Royal Ulster, the Royal Bath and West, the Great Yorkshire, the Royal Highland, the South of England and the Royal Welsh shows. The trust provides medals, cash prizes and training vouchers for junior, intermediate, senior and young farmers categories, which benefit over 50 competitors and have helped to encourage young people into shearing. The Trust supports the promotion of textiles in education at Archbishop Tension's School in Lambeth. The Trust's major fundraising event is the annual Sheep Drive across London Bridge every autumn where 600 Freemen of the City exercise their ancient rights to drive sheep across London Bridge. The event this year will be combined with a Livery Fair giving the opportunity for liveries to showcase their work and their charities.

WORLD TRADERS

For a number of years, we have been giving annual prizes to schools, and all prize-winners are invited to attend the Company's Tacitus Lecture held annually in the City of London. However, we are increasingly moving away from awarding prizes in order to put more resources into supporting learning experiences and visiting schools to support them in their aspirations.

Excellent working partnerships have been formed with educational institutions in the tertiary sector. We are delighted to have formed a long-term partnership with Birkbeck College, University of London. Birkbeck has been encouraging people from a wide range of backgrounds to consider university education for almost 200 years and the Department of Management, with which we are collaborating, has grown to become one of the largest and most successful departments. We have created a fund to support PhD students with their research costs and in addition have been funding an International Business/Management research seminar, the second such lecture to be held this summer.

Also, in the tertiary sector, we offer an annual scholarship (the Worshipful Company of World Traders Richard Charvet scholarship) to a student of the Post Graduate Diploma in Maritime Law at the World Maritime University in Malmo (WMU). The recipient is the self-funding student who gains the highest mark in the introductory module of the programme.

In the state school sector, we are in the process of establishing more working relationships, for example with Totteridge Academy and Kelmscott School in Walthamstow.

We also support a number of institutions who are involved in education in the broader sense, such as Enabling Enterprise, which develops leadership and enterprise skills in school children, Future First, a national education charity that helps state schools and colleges to build alumni communities and the Treloar Trust which provides education, care, therapy, medical support and independence training to young

people with physical disabilities from all over the UK and overseas.

We hugely enjoyed participating in the Sheriffs' Challenge for the second time this year. This is an inter-school two round public speaking competition in which teams of Year 12 students prepared and delivered a presentation on the world's greatest Living Leader. Each school is mentored by members of the FSG group of Livery Companies. We again chose to support a team from the London Academy of Excellence who chose Mohammed Yunus as their greatest living leader. Members of the Company visited the school on successive Friday afternoons to help the students prepare for the debate. Our team did not win this year but they put up a good show and the experience was very formative.

This year we introduced our own speaking competition, the World Traders Tacitus Public Speaking Competition, for school students who had attended the Tacitus lecture. Teams of participants were invited to speak on the Tacitus related topic "AI - Will It Enhance or Diminish Our Working Lives?" Where requested, the Company helped schools with their preparations. Congratulations go the City of London School for Girls for winning. We hope that this is only the first of many such events and our aim is to get state schools involved next time. We are very grateful to Westminster School for hosting this event.

The success of events such as this reinforces our belief that we have much more than money to offer and we are encouraging our members (many of whom give unstintingly of their time already) to offer their skills and experience in a variety of ways, such as mentoring, giving a careers talk or contributing to seminars or Business Studies lessons. Those who volunteer invariably comment on how much they get out of it, so it is win-win for all concerned. Last year we drew up a skills register of members who were willing to volunteer. We are delighted to be taking this to another level with the Livery Schools Link who have developed their volunteering platform to include branding so that a World Trader can sign up as a member of our Company and we are encouraging all our members to register at www.liveryschoolslink.org.uk

We also like to educate ourselves - Our members have continued to attend the Gresham College lectures, notably in June last year 'Britain and the EU one year on' by Prof Vernon Bogdanor, and in February this year 'Votes for Women - a centenary celebration'. This year we hope to attend the lecture on 'The British economy - Can we build a successful future?' on June 7th. We enjoy a meal and good fellowship after these lectures.

YOUNG FREEMEN

The Guild of Young Freemen sponsors prizes for students at the City of London Freemen's School and the City of London Girls School. The Court have also visited City of London schools to promote the Guild and highlight the activities of the Livery Companies to their sixth formers. The Guild also encourages members to sign up to the Livery Schools Link Volunteering Platform as speakers in schools or governors. We seek to encourage volunteering, mentoring and charitable giving.

The following tables have been created using the content in this booklet, based on the entries made by each Livery Company. There may therefore be omissions to rectify and amendments to make. Livery Schools Link would be grateful for all comments, corrections and further details to be sent to lis.goodwin@liveryschoolslink.co.uk by 1 September 2018 so that we can correct the electronic copy.

Educational Establishments supported by Livery Companies

Education Establishment	Livery Company
Abingdon School	Mercers
Abraham Derby Academy, Telford	Haberdashers
Academy of Contemporary Music	Musicians
Adams' Grammar School, Shropshire	Haberdashers
Aerodrome Primary School	Curriers
